KATE SMITH asked to write this message on Saving Used Fats!

"The help of every woman is needed in saving used fats for hundreds of battlefield and homefront essentials. But some of us don't know all the ways we can do it. Here are a few points I've found helpful."—Kate Smith

MANY WOMEN SAY: "But I never have fats left over." Certainly it's good economy to re-use your fats... but there's always some left over even after that...and that little is more important than you can imagine. Only one tablespoonful of used fat will help make 5 machine-gun bullets. So there just can't ever be too little to save! Come on, everybody, scrape your broiling pan, your roaster, skillet. Save meat trimmings and scraps of fat left on plates.

OTHERS TELL ME: "But my fats are often too dark to turn in." It doesn't make a mite of difference how dark or blackened or what smelly things like onion or fish you've cooked in your fat. Every drop of it will help make parachutes, synthetic rubber, soaps for the fighting and war fronts. Don't feel ashamed to hand it in to your butcher. If you save every bit of fat you possibly can, you're doing a job to be proud of!

THEN YOU HEAR: "But what sort of container will I use! Any kind of tin can will do. The next time you open a can of fruit or juice or soup or vegetables, save it. But please don't use glass it almost always breaks and makes the fat difficult to salvage When the can is full, take it to your butcher. For every pound, you'll get 2 red points. If you have any difficulty dispensing of you fets, call your Home Demonstration or County Agent.
