### Investigate before buying Land

Some people are entirely too careless when it comes to buying real estate. They buy without having the title investigated to see that it is clear of mortgages, judgments and taxes. In most cases it is money well spent to hire a good lawyer and have him make a thorough examination of the records and see that your title is good before you make the purchase. Records should be traced back and see that no taxes, judgments and mortgages are on record against a prior owner as they are frequently the ones that cause trouble.

As far as taxes are concerned, I will be glad to investigate and give the purchaser a certificate that all taxes are paid or a statement of the amount due.
