to attack. The complete layout consists of an oblong exercise pen connected to a shelter and breeding chute. As an additional safety feature, the bottom fence rail should clear the ground by at least twelve inches so that a man can escape if he should get trapped in the pen. Upright safety escape openings are sometimes provided at the chute and at the corners.

Always ring bulls at an early age and replace worn or weakened rings. A bull is less dangerous when dehorned. When ringing and dehorning, always have the animal securely fastened, Weaver says.

Farm Prices Remain High

Prices received for products sold by North Carolina farmers last month held steady at the January level, the Federal-State Crop Reporting Service says in its monthly price release.

Prices received for grains as of the middle of February held to the January 15 level with the exception of wheat and barley. Corn, oats and rye averaged \$1.57, \$1.10, and \$2.35 per bushel respectively. However, the price of wheat increased one cent from the previous month averaging \$2.21 per bushel, and barley advanced 10 cents, going \$1.70 per bushel.

Prices received for hogs and veal calves increased in February hogs bringing 20 cents more per hundred pounds and averaging \$20.70. Veal calves brought an average of \$17.20 per hundred pounds, reflecting a gain of 10 cents over the mid-January level. Beef cattle at \$14.50, sheep at \$8.50, and lambs at \$17.80 per hundred pounds were unchanged from a month earlier.

The following commodities show downward price trends: cottonseed down 3 per ton; chickens, 1.6 cents per pound; eggs, 4.5 cents per dozen; butter, one cent per pound; cowpeas, 15 cents per bushel, and wool, three cents per pound.

Loose hay was up 20 cents per ton over January; sweet potatoes, five cents per bushel; commercial apples, 20 cents per bushel, and lespedeza climbed 20 cents per hundred pounds.

"Gentle" Bull Safe Like "Unloaded" Gun

You can never trust a bull! The "gentle bull" is too often the one which acts at unexpected moments, goes someone to death or inflicts serious injury says David S. Weaver, head of the Agricultural Engineering Department, State College.

One of the principal safety rules with bulls is to handle them as little as possible, according to Weaver. With a well-constructed bull pen, any bull can be safely handled. The gates and doors, as well as facilities for feeding, watering, and breeding, can be arranged so there is no need for the caretaker to expose himself

Willie Goes to School at 23

Everybody's joking Willie Wells about going back to school. They remember when Willie would hide out in the woods—scared to bring his report card home to Pa. But under the G.I. Bill of Rights, Willie (who has a wife and baby) is getting a free education at the Agricultural College. And Uncle Sam is giving him a report: "Department, excellent! Program, above average."

over now. They're industrious and well-behaved—their favorite beverage is milk, or a temperate glass of beer. For them the "three R's" seem to mean: Responsibility, Resourcefulness, Restraint.

From where I sit, cynical folks who thought veterans wouldn't want to return to school—wouldn't stick to steady habits of work and moderation—have their answer in "undergraduates" like Willie.
