Also Serial and Short Subjects

— COMING —

"It Happened In Brooklyn"

Frank Sinatra

Coltrane Stresses Uniformity In Feeds

Memphis, Tenn.—Speaking at the opening session of the annual meeting of Southern Feed Control officials here, D. S. Coltrane, of Raleigh, president of the organization, emphasized the need for uniform high standards for feed manufactured throughout the South and the elimination of worthless ingredients in feeds.

Coltrane said that "uniformity for its own sake does not mean much unless it is rightfully and properly operated."

"Standards that lead to quality production not only benefit the ultimate consumer but enable those manufacturers striving for quality to meet competition on an equal foot," said Coltrane.

In discussing poor ingredients in feeds, Coltrane told how fertilizer in North Carolina 10 years ago contained only 15 units of plant food, whereas in 1946 it had an average of almost 20 units. He asserted that although virtually all states have laws preventing adulteration of feed through the use of rice chaff, peanut shells and corn cobs, these laws are of little worth unless the laboratories in charge of feed control activities have the services of a microscopist.

A new building was recently dedicated in Pittsboro to be used by Negro agricultural workers of Chatham County.

ROCKFISH NEWS

By Mrs. A. A. McInnis.

Bible School will begin at Tabernacle Church next Monday evening June 23rd. There will be classes for adults as well as children and young folks. Every one is invited. The time is 7:30.

Mrs. Hardy Koonce has been seriously ill for the past two or three weeks. She is some better at present and it is hoped that she will continue to improve.

Mrs. J. M. McMillan is visiting her sister Mrs. E. T. Carr at Spruce Pine this week.

Mrs. W. H. Bazzaree (Lucy Bruton) and sons of Covington, Va. are here to visit her mother Mrs. Jack Bruton and her sister Mrs. Belle Ritter and other relatives for a week or two.

Mrs. Howard Wood and children of Newport News, Va. are the guests of Mrs. C. L. Wood and family this week.

Mrs. Ida Lancaster of Miami, Fla. has been spending sometime with relatives in this community. She visited her nieces, Mrs. J. E. and Mrs. M. L. Wood last Wednesday.

Mrs. Lee Ray and daughter, Low Hilda, of New York, came here to meet her mother, Mrs. Ida Lancaster. After a short stay, Mrs. Ray will return to New York accompanied by her mother.

Miss Lillian Suggs of Waltonsburg is spending this week with Miss Grace Long.

A. T. Jones and O. L. Townsend attended the Johnson reunion at White Lake last Sunday.

Farm Accidents Take Great Toll

During the one hour you take for dinner each day, two farm residents will be accidentally killed and 205 injured, according to David S. Weaver, head of the Agricultural Engineering department at State College.

In giving these facts that were found by the National Safety Council, Prof. Weaver advises the use of good common sense in keeping down the accident tolls this year.

In 1946, about 4,500 farm workers were killed and approximately 300,000 farm workers were injured. During the same year it is estimated that motor vehicle deaths to farm residents increased about 1,000 over 1945.

Unless extra precautions are taken this year, one out of every 10 farmers will suffer a disabling injury, either on or off the job. One out of every 350 farm families will suffer the pain and sorrow which accompany accidental deaths. Fifty-two farm people will die as a result of accidents every day, and a disabling injury will strike some farmer in the United States every minute.

How can farm accidents be prevented? Farm safety is particularly a family affair because, unlike the urban dweller, the family is so closely associated with the actual operations of farming. Common sense tells us, for example, that children have no more right to be near or on a piece of operating farm machinery than city children have to be around a punch press or a moving locomotive; they have no more business driving a tractor than city children have behind the wheel of a 100 horse power passenger automobile.

Many accidents can be prevented if each family will learn what hazards menace their lives at home, at work and on the highway, what each member of the family can do to eliminate as many of these hazards as possible; and that carelessness on the part of any member of the family perils the lives and happiness of all.

IT PAYS TO ADVERTISE

COVER YOUR SOIL THIS WINTER

A thick stand of legumes or small grain is the best way to hold your topsoil and maintain its fertility during the winter. Potash will help produce a thick stand because cover crops, especially the legumes, respond well to potash. It also speeds up an early and heavy spring growth high in nitrogen and minerals for grazing or turning under. Fertilizing winter cover crops is one of the best and safest ways of applying part of the fertilizer for the cash crop to follow.

Consult your agricultural adviser.

HERE'S ADVANCE NEWS ABOUT THE NEW ADVANCE-DESIGN CHEVROLET TRUCKS

These are the trucks you'll want to see — today's newest trucks — on display soon at the Hoke Auto Company. The Advance-Design Chevrolet trucks have increased load-space longer wheel-base . . . stronger, sturdier frames. Chevrolet's new flexi-mounted cab is cushioned against road-shocks, torsion and vibration. Chevrolet's fresh-air heating and ventilating system, the Cab That "Breathes" (optional at extra cost) "inhales" fresh air . "exhales" used air, for greater driver comfort.

Chevrolet trucks are powered by the famous Chevrolet valve-in-head truck engines — world's most economical for their size—to give you extra power with greatest economy.

If you're a truck operator—interested in the plain facts of payloads and operating costs—plan to see the new Chevrolet trucks. Consult the Hoke Auto Company, Raeford, N. C. We can help you select a Chevrolet truck to fit your hauling needs.
