Lumberton, North Carolina

"Be prepared" is a good motto for the good old summer-time, when guests are apt to drop in unexpectedly. So here are some delicious dishes you can fix at your leisure and keep in your refrigerator for such emergencies.

ICE DREAM
This chocolate ice cream made with rich WHITE HOUSE EVAPORATED MILK from the A&P is grand to have on hand. Shave 2 squares unsweetened chocolate into top of double boiler. Add 1 cup WHITE HOUSE MILK and 16 whole marshmallows. Cook over boiling water till well blended; cool and add 1/2 tsp. vanilla. Whip 1 cup chilled WHITE HOUSE MILK till stiff; fold into mixture. Pour into cold freezing tray and freeze at coldest setting. When partially frozen, stir well and continue freezing. Serves 5.

SIMPLE SANDWICHERY
Sandwiches make perfect spur-of-the-moment snacks... and MARVEL SANDWICH BREAD makes perfect sandwiches. Guaranteed fresh daily, every loaf gives you plenty of thin, smooth-spreading slices. You'll find this thrifty bread only at A&P. And what a find it is!

FROSTY FAVORITE
I don't think there's a more refreshing warm weather drink than rich, tangy A&P GRAPE JUICE mixed with an equal quantity of ginger-ale. And this heat beater looks as if it came straight from the North Pole when it's served, well iced, in glasses with frosted rims. To frost, I let the rims stand 1 minute in a saucer containing 1/4" strained lemon juice, then 1 minute in a plate containing 1/4" sifted powdered sugar... and, being careful not to jar the sugared rims, store the glasses in my refrigerator till the sugar sets. Inviting as an igloo!

SALAD STANDBY
6 for lunch? Cook an 8-oz. package of A&P's ANN PAGE ELBOW MACARONI (see package directions); drain; chill; add 1 tsp. salt, 2 quartered tomatoes, 1 medium onion (chopped), 1/2 green pepper (chopped), 1 hard-cooked egg, 1/2 cup mayonnaise, 1/2 head Boston lettuce, pepper and paprika. Toss lightly.

Slight Drop Shown In Flue-Cured Crop

Production of flue-cured tobacco in North Carolina this year promises to be around 864,985,000 pounds, the Federal-State Crop Reporting Service in the State Department of Agriculture said in releasing its first production forecast of the 1947 crop.

This represents a decline of 47,985,000 pounds, or five per cent from the all-time record crop of 1946 when 912,970,000 pounds of the flue-cured crop were grown on North Carolina farms.

This forecast is based upon conditions as of July 1 and is subject to change each month until the crop is sold, depending, of course, upon weather conditions and the development of the crop. The late, dry Spring caused delay in getting the crop to the fields and most fields show an uneven growth but the crop has made much progress in recent weeks, the report stated.

The acreage of flue-cured tobacco in cultivation this season is estimated at 811,000 acres, or one per cent above 1946. Although quotas were slightly less this year than in 1946, growers attempted to plant closer to their allotments than during the war years.

Growers are not expecting as high a yield per acre as was harvested last year, which accounts for the decline in production prospects. In 1946, the average yield on all flue-cured farms was 1,138 pounds per acre, but July conditions this year point toward an average per acre yield of only 1,067 pounds, or six per cent less than in the previous year.
