**Ward  
FLOOR FURNACE**

The Ward principle of heat circulation continuously spreads the warmth evenly throughout the entire room area. Floors are never cold, corners never chilly. It really circulates the air. The Ward is vented - air in the room never gets stale or smelly. There is never any excessive dampness.

See the Ward on our salesroom floor. ESTIMATES - and advice on your heating problem gladly furnished - without obligation.

**LOOKING PRETTY**

Photo courtesy New York Dress Institute

Elastic is concealed at the waistline of this maternity dinner dress with metallic bodice, black crepe skirt.

Every woman, including the expectant mother, feels and looks prettier in the right clothes for the occasion. A long dinner dress of the kind that is simple enough for wear at home and yet dressy enough for going out is worth its investment. And there are plenty of such dresses, once more, in maternity styles shown by New York's designers for Fall and Winter.

The dress shown above is light-topped for flattery, its bodice made of chartreuse metallic cloth in oversized coin dot pattern. The black crepe skirt has this season's extra fullness, and is neatly adjusted at the waist under the narrow sash. Another becoming maternity dinner dress is all black crepe with touches of sequin embroidery on the shoulders.

The value of a farm is determined largely by its present and potential earning capacity. Its real value, from the long time point of view, depends upon the net income which can be derived from it over a period of years.

**R  
PRESCRIPTIONS**

Hardy a month goes by during which some member of the family doesn't have a cold or upset stomach, earache or minor injury. Keep them all minor by consulting your physician first, and by having us fill his prescription in our fine pharmacy department.

Protect the Appearance and Value of your Home with

**ACME Balanced  
Formula  
HOUSE PAINT**

"The best way I know to lick the weather!"

Sun, rain, snow and dusty winds pound against your house the year round, wearing away its appearance and value. A thin layer of paint is its only protection.

That's why home-owners who know paint choose ACME. For ACME House paint is made to a balanced formula. A formula that protects against heat as well as cold, dust as well as rain. Come today and see our selection of the beautiful new ACME colors.

**ROCKFISH NEWS**  
By Mrs. A. A. McInnis.

Ingatherings and quiltings are the order of the day around Rockfish these times. The ladies of Galatia church have been quilting at the Community house this week. The ladies of Tabernacle church have had two with Mrs. A. W. Wood and one at the home of Mrs. McCall this week.

The ingathering at Tabernacle church, Rockfish, was held yesterday, Wednesday. The one at Galatia will be November 6th.

Miss Ellen Parker of Laurinburg spent last Sunday with her grandparents, Mr. and Mrs. A. L. Long.

Mr. and Mrs. T. G. Wood visited Mr. and Mrs. James Wood of Raeford last Sunday.

Mr. and Mrs. Elton Barnes and children, Daphne and Tony, and Miss Gabriella Dove of Willow Springs were guests of Mr. and Mrs. C. H. Dove over the past week end.

Mrs. C. P. Monroe of Dundarach visited her sister-in-law, Mrs. M. L. Wood, Sunday.

The road from Rockfish to Parkton is to be reworked soon, we hear.

Mrs. A. W. Wood, Mrs. C. L. Wood and Craig Wood were Lumberton visitors Monday.

Mr. and Mrs. Claude McLeod and children, Marie, David and Ailise, and Mrs. J. F. Wood of Asheboro, N. C. visited relatives here Sunday.

Mr. and Mrs. J. W. Johnson and Carl Johnson of Cedar Creek visited Mrs. Ellen Jones and family last Sunday.

**State College  
Answers Timely  
Farm Questions**

**QUESTION:** When is the best time to remove tobacco stalks?  
**ANSWER:** Just as quickly after harvest as possible. This is a good practice in keeping down diseases and, when combined with crop rotations, is of great service to the tobacco grower. Of course, disease resistant strains of tobacco should be grown on infected soils - the farmer being careful to get just the strain he needs, because no one tobacco is resistant to all diseases. Turning the plant roots up to the sun so that they will dry out will help to reduce all root diseases.

**QUESTION:** How can I prevent colds and romp in chickens?  
**ANSWER:** The best thing to do, according to Prof. Roy S. Dearstyne, head of the Poultry Department at State College, is to keep the laying flock in tip-top condition. He explains that colds, bronchitis, and roup infections are generally preceded by some devitalizing factors in the flock. He suggests that the grower make sure that there is adequate Vitamin A in the diet. The litter should be kept dry. Ventilation must be controlled. Failure to do these things will result in a reduction of the vitality of the birds. When these infections hit a flock, egg production drops. The trouble may last for months.

**QUESTION:** What is a good recipe for making sausage?  
**ANSWER:** Dr. Dan Brady, in charge of meats research at State College, gives this recipe: 1 pound of table salt, 2 1/2 ounces of finely ground black pepper, and 2 ounces of sage for 50 pounds of pork, three-fourths lean one-fourth fat. Mix the materials thoroughly and then spread evenly over the meat. Stir the meat well before chopping.

Another popular North Carolina recipe includes red pepper. For fifty pounds of trimmings, use 1 pound of salt, 1 1/2 ounces of ground sage, 1 1/2 ounces of black pepper and 1 1/2 ounces of red pepper.

The average mean annual temperature for North Carolina is approximately 59 degrees F., varying for the most part over the State from 56 to 65 degrees F.

It is important that the type of farming to be followed should be kept in mind when selecting a farm.

**PASTEL STRIPES**

Pastel striped novelty cotton by Hope Killman is used for this sprightly young junior dress, brightened by the wide dust ruffle at the hem. The dress has a cut out applique fabric bow at the neck, small pearl buttons to the waist, and a full all-around gathered skirt that falls from a set-in belt.
