

State College Hints To Farm Homemakers

Eliminate farm fire loss by putting into practice the following:

1. Kerosene stored in metal containers outside of house.
2. Metal screen placed in front of open fire place in house.
3. Wiring in dwelling completely rechecked.
4. Fire extinguisher bought and placed in convenient location in house.
5. All dead leaves removed from around buildings on farm to eliminate fire hazard brought about by dry weather.
6. All sparrow nests removed from buildings.
7. Metal containers provided for matches.
8. Ladders stored in convenient place to be used in emergency in case of fire.

Stubborn starch spots left on the iron can be removed after the iron cools by rubbing lightly with grade 00 steel wool, a mild scouring powder, or a cloth wrung from soapsuds. If the iron sticks during ironing, rub it on a little salt sprinkled on paper or smooth it lightly with paraffin or beeswax. A pinch of starch will help keep starched clothes from sticking to iron.

Care in use and storage of cleaners goes hand in hand with getting your money's worth. Your cleaners and other equipment, such as mops and brooms, lose much of their usefulness if you have to go all around Robin Hood's barn to get them.

Ideal storage for your vacuum

POLAR RENDEZVOUS

The far-flung activities of American submarines during World War II that brought the undersea craft to the home waters of the Japanese Empire in the van of the fighting fronts, are continued into peacetime as the submarines, like the USS Sennet (above), penetrate the Arctic and Antarctic. Submarines are important units of the Navy's postwar expeditions and projects probing the mysteries of distant oceans for scientific data to be used for future planning. (Official U. S. Navy Photograph)

cleaner and other cleaning equipment is near the place where you use it most often. Keep it in dry bag, a basket, or on round peg, air, not too close to radiators. Heat is hard on rubber parts. Empty your cleaner of dust, or you'll have a grand breeding place for moths. Loosen the cleaner belt if the manufacturer suggests it. Always wind the cord loosely a-

round the clips that are provided. Store attachments in a pocketed bag, a basket, or on round peg. One of the most important things in operating a successful poultry farm is the supply of water. Fresh, clean water should be available in adequate amounts at all times.

ASHLEY HEIGHTS NEWS

By Mrs. Ralph Cothran

Mr. and Mrs. Fred Riley of Florida spent Sunday with Mr. and Mrs. N. F. Sinclair and family.

Mr. and Mrs. M. D. Greene spent the week end at Whiteville visiting relatives.

IT PAYS TO ADVERTISE

NOW IS THE TIME . . .

to use Cyanamid on your Tobacco Plant Beds and rid them of weeds. For best results Cyanamid should be used 90 days before seeding, certainly 60 days before seeding.

We have Winter Peas, Vetches, Clovers, Rye Grass, Small Grains, and other seeds needed at this time.

Too, we have NITRAGIN inoculation in stock. Use of Nitragin will materially increase the effectiveness of your Winter Peas, Vetch, and Clover seedings.

Try Sheep Manure on your lawn and in your garden. Ask those who have used it about the results they are talking about.
