Money Talks

For friendliness and warm sincerity, there is nothing in the class of the form letter.

This is particularly so when your name is spelled wrong, and the type in the letter fails to match the address.

The only thing in the writing field that approaches it is the collection letter . . . disguised in a beautiful envelope to look like an invitation to a wedding. Did you ever get one? No? Well . . . you're lucky. But strange to say form letters do get results . . . if they are continued. What they lack in quality they make up for in quantity. They keep at it . . . and eventually get you.

Same way with saving money a little at a time. By keeping at it persistently and consistently . . . thousands of families have found the way to home ownership and financial security.
