Miss Florence Sides is ill.

Mr. and Mrs. J. C. Keith of Rockingham, visited in the E. B. Satterwhite home last week-end. Mrs. Keith is a sister of Mr. Satterwhite.

**State College Hints To Farm Homemakers**

Home economists say there is an element of chance in washing rayon if the label carries no facts about its washability, or if the sales clerk wa not too specific in giving information. Never let your rayons become extremely soiled and never soak or boil them. Unless specifically labeled for "all-purpose" soap, use a mild soap on rayons. When there is a "go-ahead" signal for washability, very little pampering is necessary. You may, of course, wash it by hand. But if the seams are well-finished and well tailored then there is no reason for not machine-washing it: Warm water about 105 to 110 degrees F. is very effective as most rayons clean easily.

Rayons require a relative short washing period — 2 to 4 minutes is sufficient — for protection of the fiber which is weaker when wet. Short periods are usually effective for filament rayons because their fiber tends to resist soil and cleans easily. The washing action of the washer must be gentle. Rinse rayons thoroughly but speedily. Avoid unnecessary wringer wrinkles. Never wring by hands or twist. If washing by hand, press water out between a towel.

Unlike cotton clothes which are allowed to dry completely and are then redampened, rayons, particularly dresses and blouses, are

ironed best when they are allowed to dry only until partially damp for ironing. Don't make the mistake of trying to iron your rayons too damp. You will waste time and may stretch or distort the fabric.

If you want to stretch that food dollar, plan carefully the three meals a day. Plan at least three meals at a time and be sure to include all of the things you need for good nutrition. Compare your menus from day to day for variety and balance in meals.

**Lenoir Farmer Wins State Corn Contest**

A Lenoir County farmer who produced an official yield of 148.26 bushels per acre has been declared winner of the North Carolina Corn Growing Contest for 1948.

He is F. L. Albritton, La Grange, Route 3, who spent \$6105 for fertilizer and \$40 for power and labor on the one acre. Since he sold the corn on the day it was harvested for \$192, his net income was \$86—more than double the gross income from the average acre of corn in the State.

Runner-up in the State competition was H. F. Hudson, who farms land owned by F. Hunter Pope near Enfield, Halifax County. His yield was 142.88 bushels per acre.

J. R. Simpson, Waxhaw, Route 2, Union County, took top honors in the Piedmont region with a yield of 136.42 bushels per acre. In the mountain region the champion was a Macon County 4-H Club boy, Fred Deal, of Franklin, who produced 135 bushels per acre.

The winning State and regional contestants received cash awards in Concord last week at the annual meeting of the State 100-Bushel Corn Club. The meeting was held in connection with the annual sessions of the North Carolina Crop Improvement Association and the

North Carolina Foundation Seed Producers, Inc.

Dr. E. R. Collins, in charge of agronomy extension work at State College, served as chairman of the State Corn Contest Committee. In announcing the results, Dr. Collins emphasized that the winning yields were not

necessary the highest in the State. Other farmers, he said, may have equalled or exceeded these yields but were not eligible because they had not entered the contest or because their production was not checked by an official committee.

I, R. B. Lewis, Exec. Vice President, of the above-named bank, do solemnly swear that the above statement is true, and that it fully and correctly represents the true state of the several matters herein contained and set forth, to the best of my knowledge and belief.

CORRECT—ATTEST: R. B. Lewis.

J. B. Thomas, H. L. Gatlin, J. L. McNeill—Directors.

State of North Carolina, County of Hoke, ss:

Sworn to and subscribed before me this 10th day of January, 1949, and I hereby certify that I am not an officer or director of this bank.

My commission expires March 18, 1950. Clara Mae Jones, Notary Public.

*Do you tell time by Baby?*

At his feeding times, yes. He sounds off on the dot when a meal's due. But the rest of your day, you're wise to depend on electric clocks.

With a baby in the house, it's surprising how much you depend on electric service — to prepare and refrigerate his food, heat water for his bath and laundry, wash his clothes, and so on.

Of course, you depend on electricity to help take the work out of your housework too. Always ready, it lends a willing hand with heavy chores, provides comfort, ease and even entertainment. And best of all, you can depend on its economy — for what other item in your budget does so much for so little?

Your friends and neighbors in this company — under sound business management — are continually using their technical skill and practical experience to keep electricity the biggest bargain in that budget of yours. You can depend on that too!
