Meet a has-been!

Meet Mr. Mercury! The old Romans thought he was the messenger of the gods. With those winged feet he got around fast, doing all sorts of useful little jobs on the way. This Roman messenger is out of date now. For speed, you can't beat electricity. It's on hand 1/10,000,000th of a second after you flip a switch.

You can't beat electricity for usefulness, either. It's like an extra pair of hands for the homemaker—always ready and willing to help clean and sew and cook, do the laundry, make life easy, and healthy and comfortable. And you can't beat electricity for cost! Just think, one penny's worth of electricity will run your radio for a full evening—or swish the dirt from two tubs of wash—or tell you the time for a week. In this era of sky-high costs, what other item in your family budget does so much—for so little?
