Shower for Mrs. J. D. Gibson

Mrs. J. P. Barbour and Mrs. Sydney Sumner were joint hostesses at a miscellaneous shower at Rockfish Community house last Monday night given in honor of Mrs. J. D. Gibson, recent bride. As guests arrived gifts were placed on a table. Later when she entered the room, one look was enough to assure Mrs. Gibson that a wonderful treat was in store for her. Mrs. Irene Zaska directed the games and contest ending with several rounds of bingo. Prizes received by the winners were presented to Mrs. Gibson, who upon opening and displaying these and all her gifts was so enthusiastic in her praise of them, there could be no doubt of her

sincere appreciation of all the beautiful and useful things she received. For refreshments punch and cookies were served.

State College Hints To Farm Homemakers

Experiment and research have proven that water should be boiling before vegetables are put in it to cook. Turnip greens, put on to cook in about their own weight of cold water and cooked 30 min. from time boiling began, held only about a third of their original vitamin C, but those put into boiling water and boiled the same length of time held three-fourths of their C. Likewise asparagus and green beans, cooked by these two methods, retained more C when started in boiling water.

To save time and do a more accurate job of cutting out a pattern, clothing specialists have found that weights sometimes are better than pins for holding the paper pattern on the fabric. If the fabric is thick, pins make it "buckle," so that exact cutting is difficult. When it is necessary to cut through two thicknesses of fabric, the pinning may cause so much buckling that one piece comes out a different size from the other.

Weights allow the fabric to lie flat and anchor it against shift-

ing. Small objects of heavy metal like bolts, nuts, small paper weights, short metal bars or even small carpentry tools may be used for pattern weights. Lay the weights far enough away from the edge of the pattern to allow for easy cutting.

For cutting out medium or light-weight fabric, pins generally are better than weights.

Cover the inside of your clothespins with scotch tape or adhesive tape and keep those clothespins in a separate bag for your more fragile fabrics. Plastic clothespins are also available now. These are smooth surfaced, and will not catch on delicate materials. If the article of clothing is very fragile, simply hang it over the line.
