Tobacco Exports Assessment Will Be Voted On Also

North and South Carolina flue-cured growers have "more than a \$170,000,000 stake" in Saturday, July 23 referendum on the 10-cents an acre self-assessment to protect and develop export markets through Tobacco Associates.

This was pointed out this week by J. Henry Vaughn, Elm City, N. C., Tobacco Associates' Board of Director chairman, and L. C. Norton, Dunbar, S. C., a board member, who said:

"The total income for the 1948 crop was about \$361,556,000 on 571,691.4 acres an average per acre yield of 1.264 pounds in North Carolina, and \$65,822,962 on 100,365.3 acres with an average yield of 1,312 pounds in South Carolina. Some 40 percent of the annual crop is exported, so that meant a value of \$144-

622,400 on the portion of North Carolina's 1948 crop that went to foreign buyers, and South Carolina's exports were worth \$26,-329,184.

"So, Carolinas' producers have more than a \$170,000,000 stake in the Saturday, July 23 referendum on the 10-cents an acre self-assessment annually in 1950, 1911 and 1952. In 1947 the growers voted overwhelmingly, 99 to 1, to so assess themselves during 1947-1948-1949 to promote exports through Tobacco Associates."

The leaders stressed that the Tobacco Associates program is admired by other commodity groups, primarily because farmers farmers founded it, with the help of allied tobacco groups.

"Tobacco growers decided to do something to help themselves," they added, "so they formed Tobacco Associates to help maintain and develop our export market. The General Assemblies of both states passed enabling legislation
