**BEAT THE HEAT WITH AN ELECTRIC ATTIC FAN. IT'S ECONOMICAL, TOO!**

© RK

You will be amazed at the difference an electric attic fan can make in the summer comfort of your home. This quietly running fan installed out of the way in your attic will assure you of comfortable sleeping even during the hottest nights . . . it will keep your home pleasantly cool during the day as well.

Without an attic fan, even after the sun goes down on hot summer days, there is a layer of super-heated air imprisoned under your roof that keeps your home unpleasantly warm most of the night. An attic fan gets rid of this hot air in the attic and pulls cool air into the house through downstairs windows and rapidly lowers the temperature of the entire house. Next day, because your home is cool, even the hottest sun cannot heat it as rapidly as it ordinarily would. Yes, an attic fan is a great comfort when the weather gets HOT!
