FACTS ABOUT BEER

From the Census of Manufactures

The U. S. Census of Manufactures supplies what is probably the most authoritative index of an industry's place in the national economy.

Preliminary reports for 1947, the first business census since 1939, are now being released by the Government. They show that the brewing industry makes a valuable contribution to the nation's welfare and economy.

The Government report shows that in 1947, the brewing industry paid out \$292,000,000 in both wages and salaries, spent \$509,000,000 for materials, supplies, containers, fuel and contract work, and another \$111,000,000 for new plants and equipment—making a total of approximately \$912,000,000.

The brewing industry employed 82,524 persons—63,668 of them being engaged in production and other related operations. This latter group averaged \$3,300 per year per worker—one of the highest wage averages to be found in any American industry.

For three centuries beer and ale have contributed to moderation and temperance in America. The Census report confirms that economically, too, beer's legal sale and manufacture is an American asset worth preserving.

Hollywood Style Shorts

Gold filagree and cultured pearls were used by a jewelry craftsman to make a beautiful pair of antique pendant earrings. These, from the jewel box of Barbara Hale, currently co-starring in RKO Radio's "The Window," are for the woman who wisely wears only one striking item of jewelry at a time.

The lovely star uses them to accent her head-hugging turbans, as a contrast to her short coiffure and as an accessory to off-shoulder dancing frocks.

CARD OF THANKS

We wish to take this way to express thanks to our friends and neighbors, both white and colored, for the many acts of kindness and sympathy shown us during our recent bereavement. The family of J. M. Norton.
