State College Hints To Farm Homemakers

Home-packed lunches for school must offer a good square meal, appealing each day. So don't forget: (1) A thermos bottle for soup, cocoa, milk. (2) A variety of sandwich spreads. (3) Changes in breads, whole grain, peanut butter, black walnut. (4) Lunch cakes and cookies. (5) Desserts to pack in jars or paper cups. (6) Crisp relishes and fresh fruits.

Today we have safer highways, safer cars, traffic safety devices and traffic laws for the protection of all - and all of these are being constantly improved, yet thousands are being killed and injured through heedlessness.

When driving, observe the written traffic laws, and the unwritten laws of common sense. As a pedestrian, observe the traffic signals and signs; cross streets at intersections only.

"Repairs" are better than repairs if ready-made clothes need strengthening with a few well-placed stitches. Reinforcing before a garment is worn insures better service. Clothing specialists suggest checking over a new garment to see if it needs any of the following reinforcements:

Seams: To strengthen a narrow or loosely stitched seam on an expensive garment, restitch seam about 1/16 inch deeper. On a better garment, rip out and restitch any broken, knotty, drawn or crooked stitching. If material frays, run a row of machine stitching near cut edges.

Dangling threads: Fasten thread ends, pulling to the inside and tying securely. Or run them through a needle and fasten with a few over-and-over stitches.

Bindings: If a binding is sewed too close to the edge in some plaques, rip it, and move it in a little deeper, being careful not to stretch the edge.

Hems: If a hem is insecurely stitched, rehem with blind stitches that will not show on the right side.

Plackets: Strengthen the end of a placket with extra stitches; or sew tape stays across ends on underside.

Pocket corners: For pockets in a blouse, reinforce stitching at corners of opening. To make dress and apron pockets more sturdy, lay a piece of tape on the underside of garment in line with pocket top. Stitch it in with the corners.

Fastenings: Rework raveled or weak buttonholes. Resew snaps or hooks and eyes securely, and resew loose buttons with strong thread, leaving a shank of thread so the buttonhole can clip under the button without straining the cloth.

Finishing: Underarm shields and a back shield keep a dress fresh longer postpone cleaning and lengthen wear. Sleazy trims which make a garment look cheap may sometimes be replaced by more durable trimmings. On some garments, collar edges, neck openings, belts and sleeve openings can be strengthened and made more attractive by a row or two of top-stitching.
