### Will you walk into my parlor?

The spider doesn't have to drag his dinner into the web. Just one willing step inside, and the unthinking fly is hopelessly trapped, a strand at a time.

That's how a nation gets trapped into a socialistic form of government. Not all at once—but a strand at a time—until all liberty is lost.

Here's how it happens. The government of such a country—in the guise of the people's welfare—begins to assume more and more control over that nation's industries and services. Little by little, the people turn their responsibilities over to their government—and, eventually, their liberties as well.

And it can happen here. There are in America people who want the government to have more and more control over American life. "Let the government begin," they say, "by taking over the doctors, the railroads, the newspapers, the electric light and power companies."

It's strange, but many of these people—like most Americans—don't really want a socialistic U.S.A. But the result is the same. When government, a little at a time, controls enough things, you have a socialist nation, whether you want it or not. But by then it is too late.

Remember the fly and the spider web. That first step in is the most important!

## Look at the FUN you're missing!

**S**URE, we know—a car is a "necessity" these days. A modern family "couldn't get along without one." Or so you tell yourself.

Come, come, sir! We know, and so do you, the real reason you got the new-car fever—and the kind of car you are hankering for.

You want a car with some fun in it, don't you?

A car you'll get a big bang out of every time you see it parked in front of your house—every time you slip into its front seat—every sweet and easy mile you travel in it.

Well, come see what this beauty does for you.

How the doors swing open in warm welcome at a thumb touch on a button. How the broad seats invite you to take it easy. How the big straight-eight under the

bonnet snaps into purring life at your toe-touch.

And then note—

How smoothly you slip away from the curb—especially when Dynaflo\* is handling the power transmission.

How firm and steady the whole car feels. How it holds on curves, free of "heel-over" and sway. How each coil-sprung wheel quicksteps over bumps and rough spots that mean jounce and jiggle on most cars—how buoyantly road-free a Buick is.

\* Dynaflo Drive is standard on ROADMASTER, optional at extra cost on SUPER and SPECIAL models.

### FOUR-WAY FOREFRONT

This rugged front end (1) sets the style note, (2) saves on repair costs—vertical bars are individually replaceable, (3) avoids "flecking horses," (4) makes porting and garaging easier.
