The world harvest of flue-cured tobacco is expected to reach a record level during the 12 months from July, 1950, through June, 1951. The total is estimated at 1,907 million pounds, or 7 per cent more than was produced in 1949-50.

Richmond County farmers are making a determined effort to pro-

duce a good small grain crop this year. In most cases, growers have followed such approved practices as good land preparation, seeding new varieties, and top-dressing at an early date.
