**quick-hitch "DRIVE-IN" CULTIVATOR**  
for the CA Tractor

The Allis-Chalmers "drive-in" system eliminates heavy lifting and blocking up ordinarily required for front-mounted tools. You just drive your tractor into the frame and bolt it on.

In the field, too, the CA Cultivator is unmatched for good work and ease of operation. With the hydraulic system set for delayed action, front gangs lift the moment you push the hydraulic lever. Rear gangs cultivate to the end of the row, then lift automatically.

Round, tubular gang assemblies offer almost unlimited choice of shank settings. Parallel linkage leads shovels naturally into the ground without forced pressure.

The CA Cultivator has many other outstanding features we would like to show you. Stop in and see us.
