You can tell in an instant it's a Very great 8

At idling speed, the engine of this 1953 Buick is deceptively docile. All you hear is a silken whisper, a kitten purr, a smooth flow of air channeling quietly through metal passageways. Then—you want to go. You nudge the pedal. You go. That's when you discover that you're sitting behind an engine of electrifying response. That's when you begin to know how the power of the first Fireball V8 can handle getaway, cruising, hill-climbing. That's when you learn what Buick's biggest-compression engine in fifty great years can mean in spirited and soul-satisfying road command. It's an experience too wonderful to miss—the bossing of this brilliant new V8

Engine that powers every 1953 Buick SUPER and ROADMASTER. So we cordially invite you to come in and try it. We cordially invite you to hold rein on this truly advanced V8—the world's first V8 with vertical valves, with "T" type intake manifold, with zero-power-loss muffler—and the first standard-production American passenger-car engine to reach 8.5 to 1 compression ratio. Why not come in for a sampling? That way you can also try the other Buick gems—like Twin-Turbine Dynaflow\*—and the Million Dollar Ride—and the room and visibility and handling ease of the greatest Buicks yet. Can you make it this week?
