EMERGENCY FIRST AID—Sp5 Serge P. Carriere, a medic with the 507th Air Ambulance Company, administers first aid to the victim of a simulated auto crash, Sp4 Julie Blanchard, Meriden, Conn., a WAC assigned to Brooke Army Medical Center. Sheriff Snyder of Bexar County, Tex. looks on.

Project Tests Emergency Aid For Traffic Accident Victims

WASHINGTON (ANF) — A joint test program to determine the value of helicopters in providing medical assistance to auto accident victims and other persons needing emergency medical care has been announced by Secretary of Defense Melvin R. Laird and Secretary of Transportation John A. Volpe.

Called PROJECT MAST (Military Assistance to Safety and Traffic), the program began in the San Antonio, Tex. area July 15 and will run through Dec. 15, 1970.

Army helicopters and medical corpsmen provide medical assistance to civilians involved in emergency situations utilizing medical aid and evacuation techniques developed during Korean and Vietnam wars. Rapid evacuation by helicopter has been determined as one reason for the survival rate of wounded soldiers increasing from 995.5 per 1,000 in World War II to 997.7 per 1,000 in Vietnam.

Most assistance is expected to be for victims of highway accidents, and the test also provides transportation for doctors needed by critically injured or ill persons, especially in remote or rural areas.

The Army's 507th Air Ambulance Company, Ft. Sam Houston, San Antonio, Tex., is maintaining one UH-1 "HUEY" helicopter and crew on constant alert to respond to emergency calls. The UH-1 can transport three stretcher and four sitting patients plus flight crew and medical personnel.

Requests for Army assistance are routed through the Bexar County Sheriff's Office. Sixteen civilian and two military hospitals in the 10-county area of the test program are participating.

You won't need the "new math" to figure out the advantages of these Metropolitan annuities which can provide teachers and others who are qualified with a monthly income as long as you live.
