

Distaff DEEDS

By JANICE R. CHRISTENSEN

Men and women filing personal bankruptcy petitions in U.S. Middle District Court, which includes Greensboro and Winston-Salem, are being required to attend a school on money management.

Classes are taught by Robert Suggs, Greensboro, permanent trustee for the Court, and Mrs. Kathryn Reese, home economics Extension agent, Guilford County.

During the two-hour session, debtors are given suggestions on how to budget and are warned against easy credit and installment buying.

How effective the classes will be won't be known for several years. Those attending classes are forbidden, under court orders, to buy anything on the installment plan up to three years without the permission of the court.

The litter, along a two-and-a-half mile stretch of highway in Montgomery County, filled 49 garbage bags.

At the time they decided to work on the clean-up project, members of the Belford Community near Candor, didn't realize what a big job they were undertaking.

"Each can or bit of paper in itself seems harmless, but it rapidly accumulates into a messy, unsightly problem," Mrs. Ed Ewing, a 4-H leader, told Laura Odom, assistant home economics Extension agent.

An Extension Homemakers program "Equipment for the Handicapped," proved useful to Mrs. Hugh Farnior, Greenville.

A few days after the lesson, her sister-in-law came to the Farnior house to recuperate from back surgery.

Mrs. Farnior had a bedside assist made for her sister-in-law. The assist, attached to the bed rail, is used by the patient to help pull herself up and out of bed. Mrs. Evelyn Spangler, assistant home economics Extension agent, Pitt County, explains.

The patient was pleased to have something that enabled her to help herself, thereby making her less dependent on others, the agent adds.

There seems to be a fever running through Warren

County and that fever is for better housing.

During the past two years, 63 new houses have been built in the county and other dwellings have been remodeled through cooperation between families and the Farmers Home Administration and Agricultural Extension Service.

Other houses have been built and improved with aid from other sources as well, Mrs. Bertha Forte, home economics Extension agent, notes.

Oatmeal boxes and half gallon milk cartons are for the birds, according to Donald and Ronald Langdon, Benson, Rt. 3.

The boys, sons of Mrs. Nancy Langdon, used their imagination to design bird houses out of these discarded containers.

The 4-H'ers cut a hole in the side of the containers for small birds to enter. To make the boxes waterproof and to give them a wood design, they used contact paper to cover the boxes.

The Langdon boys are anxious to put up their bird houses next spring to see if any birds make their homes in the boxes. Mrs. Patricia Brown, assistant home economics Extension agent, Johnston County, adds.

Fifty seven young Cleveland County girls are wearing new dresses to school, thanks to an Extension clothing workshop.

Only 14 of the 57 girls had made a dress before. The majority of them had never used a machine or cut out a garment. Jessie Ann Wingo, home economics Extension agent, notes.

The girls, and their mothers, too, were proud of the results, the agent observed. Most of the girls were 10 and 11 years of age.

August 20 may well be remembered as the day a mattress fell on main street in Elizabethtown. Here's the story.

Following an Extension mattress making workshop, Mrs. Louise Tyson, tied the mattress she had made on the top of her car to carry it home.

It blew off the car in the middle of town creating quite a stir.

VOTE - Mrs. Ruth McNair casts her ballot in Raeford One Tuesday in the General Election. A total of 1,614 persons voted in the county, the lowest total recorded for an off-year election.

Toad Suck Ferry Departs; Others Keep Chugging

The Toad Suck Ferry down in Arkansas has paddled into oblivion.

It took a \$1.3 million bridge to replace the old sidewheel barge that labored across the Arkansas River 40 miles upriver from Little Rock, the National Geographic Society says.

No one is quite sure how the ferry got its name, but it had conveyed people, horses, mules, and automobiles for 150 years. Many other ferries around the country stubbornly refuse to become vanishing Americana.

In Guion, Arkansas, a few years ago, the townspeople

raised part of the money to buy a new six-car ferry for the White River by selling pies, cakes, and barbecued meats at socials. Small cable-drawn ferries once were important in Arkansas, and the ferryman was a man of stature.

More than 40 years ago, a ferryman named Hoover operated a little tin- and-plank vessel on an Ozark stream. One of his patrons was distressed to hear that "Mr. Hoover" had just been elected President "Land sakes!" she cried, "Who's going to run the ferry?"

In Turkey Neck Bend, Kentucky, community pressure

recently forced the state to buy the prize ferry across the Cumberland River and operate it around the clock. The craft formerly had stopped running at night, forcing local residents to detour 50 miles to the nearest town.

"Anyone here who gets real sick at night just figgers he's gonna die," said one Turkey Neck Bend farmer before the new service started. On Maryland's Eastern Shore a ferry has operated continuously for 210 years across the mouth of the Tred Avon River. Passengers hoist a sign to summon the ferryman. The Jersey Belle of Crisfield, Maryland, makes daily trips of exactly 60 feet - in 29 seconds it - across a channel to Jersey Island.

Ferries still steam across Lake Champlain between New York and Vermont as they have for the past 200 years. One of the lake's most colorful ferryman was Captain Elisha Goodsell, a resourceful Yankee.

Authorities once threatened to tie up his 85-foot, double-ended steamer Venus because she didn't comply with regulations for vessels more than 65 feet long. Goodsell promptly beached the boat, sawed 10 feet off both ends, planked them up, and returned her to service.

In 1962, no sooner had San Francisco retired the last of its Bay ferries than a group of commuters organized their own private ferry route. They provided themselves with all the amenities, including coffee in the morning and cocktails in the evening.

The Staten Island ferry recently survived another attempt to raise its bargain 5-cent passenger fare for the 25-minute cruise between Lower Manhattan and Staten Island. Even grimly urban ferries can inspire affection. A New Jersey commuter lamented the end of a Hudson River ferry:

"It's all passing. The gulls will wheel and cry above, but we won't see them. Great ships bound for distant lands will pass over us, unaware. The water will lap gently against the slips, but we won't hear it. We'll be passing underneath in a hole in the ground."

Farm Items

W. S. YOUNG, COUNTY EXTENSION CHAIRMAN

The fall of the year is a good time to fumigate your tobacco plants. Usually the soil is in better condition and the materials will work better when the temperature is warmer. Methyl-Bromide has proven to be a top notch material to control weeds as well as the nematodes. It is usually used at the rate of 9 pounds per 100 square yards of ground. It can be used direct from the can or it can be used in a hot water bath. This vaporizes the Methyl-Bromide as it leaves the can and cuts down on the time the cover should be left on.

Covers should be left on from 24 to 48 hours after the direct method and 6 hours with the liquid method. Now is the time to get prepared for next season's plant beds.

Now is the time to make plans for late fall and spring landscape work around the home. Any large, overgrown and unsightly shrubs should be severely cut back. Often, these need to be cut to within 6-10 inches of the ground. They will begin growth in the spring and produce a much better plant form. At many homes, overgrown plants should be replaced with dwarf species of varieties. Shrubs that grow in a clump, such as Nandina or Manonia, can be dug, divided and reset.

This is a good time to start cleaning up the equipment that you used during the summer.

Tools should be gathered up and placed in some kind of storage, if possible. Such things as fertilizer equipment should be cleaned thoroughly and then oiled. Tractors and other equipment that runs should be winterized or completely drained. All left over pesticides should also be cleaned up and placed in an area where they can be locked. This cleanup will make your surroundings look better and also get you on better terms with your family.

The News - Journal

Social Security News

C. V. SHELTON,
FIELD REPRESENTATIVE
Fayetteville Social Security Office

How disabled does one have to be to qualify for disability benefits from Social Security?

When Social Security started out, it foresaw making payments upon retirement. Later, survivor's benefits were included, and finally disability benefits. Social Security benefits to disabled persons have been payable since July 1957, but there is still misunderstanding as to just how disabled one must be to be eligible to receive payments based upon disability.

Well, how disabled do you have to be? To qualify, the disabled worker must have a disability which is expected to last for at least one year. And the disability must be severe enough to keep the worker from engaging in substantial gainful employment. A lot of words which boiled down mean that if the disabled person is able to work and earn \$140 per month, he is not considered to be severely enough disabled to qualify.

What are the types of conditions which are generally considered to be qualifying ones?

1. Loss of major functions of both arms, both legs or a leg and an arm.
2. Progressive diseases which have resulted in the loss of a leg or which have caused the leg to become useless.
3. Severe arthritis to the extent that the ability to get about or use the hands is severely limited.
4. Diseases of heart, lung or blood vessels which despite medical treatment, results in breathlessness, pain or fatigue.
5. Diseases of the digestive system which cause severe malnutrition, weakness and anemia.
6. Serious loss of function of the kidneys.
7. Cancer which has not been controlled or cured.
8. Damage to or abnormality of the brain with severe loss of judgement, intellect, orientation or memory.
9. Mental illness resulting in marked limitation of activities and interest, deterioration in personal habits and seriously impaired ability to get along with other people.
10. Total inability to speak, see or hear.

For further information on disability benefits, please telephone us at 483-2661 in Fayetteville.

AMC Has New Boss

WASHINGTON (ANF) - Secretary of Defense Melvin R. Laird has announced that Lt. Gen. Henry A. Miley has been chosen to succeed General F. J. Chesarek as commanding general of the U.S. Army Materiel Command (AMC).

General Miley, who has served as AMC's deputy commanding general since June 1969, has been nominated for promotion to the rank of general by President Richard Nixon. He assumed his new position Nov. 1 when General Chesarek retired.

Maj. Gen. Woodrow W. Vaughan, deputy chief of staff for logistics, U.S. Army Europe, has been named to succeed General Miley as AMC's deputy commanding general.
