FESTIVE BIRD - Golden brown roast turkey, served on the best platter and surrounded by holiday peach ambrosia makes a delectable Christmas dinner.

## The Tar Heel Kitchen

By Miss York Kiker N.C. Department of Agriculture Marketing Home Economist

Fond memories surround the Christmas season and often they are tied to traditional and family food favorites. By all means, plan for a beautiful big roust turkey to be served elegantly on your best platter. Southern tradition frequently calls for ambrosia as the favorite dessert for the climax of a hearty meal, but for variety try Holiday Peach Ambrosia as the delectable garnish for the roast turkey.

Turkey is an excellent meat buy. Modern day turkeys are fast cooking, have more meat per bone weight, and have more white breast meat available than in earlier days. Choose a whole turkey turkey roll, roast or parts according to your needs. You will find turkey ranks high in food value and relatively low in calories.

A smart planner will want enough turkey to last more than one meal. Extra turkey may be sliced and carefully packaged and frozen for later use. Sometimes the "planned" left - over turkey is as delicious as the festive bird on Christmas Day. Fond memories are stirred of visits with friends to share in creamed turkey or turkey hash on waffles! Quick and easy creamed turkey will provide tasty eating for your family as it will at the open house in our test kitchen in the Department of Agriculture.

In my family, soft custard is one of the traditional foods served along with cake and cookies. As a child, we poured custard over orange sections and is still a good idea for you

powder to taste. To be more authenic curry, grated coconut may be added. SOFT OR "BOILED" CUSTARD

4 cups (1 quart) milk, scalded 4 eggs, slightly beaten a cup sugar, all white or half white and half brown 14 teaspoon vanilla

¼ teaspoon salt Scald milk in top of double boiler over hot, not boiling water. Beat eggs slightly and beat in sugar. (Part brown sugar gives a nice caramel flavor). Pour the scalded milk slowly over eggs and sugar mixture. (Stir well while pouring or hot milk will cause eggs to cook and lump.)
Return the custard to the top of the double boiler. Stir over hot water until mixture forms a coating on a silver spoon. (Cook a little longer if slightly thicker custard is preferred.) Remove custard from heat and cool at once by placing pan in cold water. Stir a few minutes and add salt and vanilla. Chill thoroughly and keep cold until served.

Custard is delicious "as is" other flavorings, over fruits, cake or ice cream. For extra fancy desserts, top with whipped cream.

Several Education T.V. District Court Room, Everyone programs will be coming up on Channel 4 during the month of January that will be of interest is invited to come.

to Hoke County people The first one is on January 12, 1971 from 2:30 - 3:30 P.M. It is entitled "Your Federal Income Tax" and deals with the changes that was made in the Tax Reform Act of 1969. Viewers can call into the station and ask questions

during the last half hour.

The second program deals with corn production and also the corn blight. This one is on January 19, 1971 from 2:30 3:30 P.M. Chemicals for use in corn production will be discussed during the program.

A program in personnel management for farmers has been developed by the

A tobacco fertilization program should be designed to supply the crop with enough of the different nutrients to grow a good yield of high quality tobacco at an economical cost. Many growers can reduce their fertilizer cost by 25 to 50 percent by carefully selecting the rates and sources of

nutrients. The complete use of 3 - 9 - 9

for preplant and sidedressing will cost about \$60.00 per acre. The use of 1200 lbs. of 3 - 9 - 9 and 160 lbs. of 15 - 0 -

14 will cost about \$43.00 pe acre. Also by using 900 lbs of a 4 · 8 · 12 plus the 15 · 0 · 14 sidedressing you can get out with a cost of about \$30.00 per acre. Higher analysis fertilizers such as 6 - 12 - 18 and 8-16-24 can be used and cost \$27.00 and \$25.00 for nutrients. All of these combinations give about the same yields and quality of

Much research is being carried on in the topdressing field and growers will probably be using a 16 - 0 - 0 or a 15 - 0 - 0 in a few years.

Correct management in fertility can save every farmer money in production cost.
