Hoke Grows Pulpwood

Hoke County landowners and loggers shared approximately \$147,697 paid out by Catawba Timber Company for pulpwood in 1971, according to the company's president, W.M. Morgan.

This is one of nearly 70 counties in the Carolinas, Georgia and Virginia where Catawba Timber purchased wood for its parent company, Bowaters Carolina Corp.

Although Catawba Timber owns and manages some lands of its own, a substantial majority of the wood it supplied to the mill was purchased from individual landowners.

Many of these landowners are tree farmers and are actively participating in growing the "South's Third Forest." This is the term used in describing modern-day efforts to meet growing needs for wood products.

Sixty years ago, the first forests of the South were believed to be exhausted, but industry and private landowners grew the second one, which has supplied timber during that time. During the past 20 years, the volume of standing timber in the South has been increased by 30 percent.

Despite this gain, foresters say more intensive efforts will be needed to keep with growing populations and demands for forest products.

Government authorities estimate that the total need for forest products will double by the year 2000. They also project a 20 percent reduction in the acreage per person to meet these needs.

Catawba Timber and other forest landowners are taking steps to meet these needs by planting millions of new trees each year, more than are being harvested.

These forests also make a vital contribution to air improvement. An average acre of vigorously growing young trees consumes five to six tons of carbon dioxide a year, and gives off about four tons of fresh oxygen.

Veteran's Fund Gets Donation

Dr. Raymond A. Stone, president of Sandhills Community College, has announced the gift of \$2000 from the Sandhills Veterans' Association for financial aid to nursing students.

Dr. Bruce Warlick, president of the Association, presented the check to Dr. Stone at the February meeting of the organization. The Association was organized after World War II and has as its central purpose the promotion of training of nurses for Moore County.

Since the Associate Degree Nursing Program was established at Sandhills in the fall of 1966, the SVA had made an annual contribution to the college of the entire proceeds of its yearly fund raising campaign.

In presenting this year's contribution to the college, Dr. Warlick expressed gratitude for the nurse training program at Sandhills, and for high percentage of Sandhills graduates who are now serving as Registered Nurses in Moore County. Dr. Warlick also said, "We are highly interested in the Practical Nurse Education program about to start and want to support it also. We are pleased to conduct an annual campaign and act as a receiving agent for many contributions from people throughout Moore County to support the nurse training.

HOW DOES A&P FEEL ABOUT CONSUMER PROTECTION?

Concerned... very concerned!

If we weren't, we would not have an unconditional money-back satisfaction guarantee on every product we sell... no matter who makes it.

If we weren't, we would not have established, decades ago, our "Quality Control Laboratory".

How does the laboratory protect you? Well, at A&P, we're pretty fussy about the products we sell. So, before we will stock a product, we check it out pretty carefully. Our lab has checked thousands of products. If they don't think the product measures up, you'll never find it on an A&P shelf... no matter who the maker is, or who is behind the product.

It's not always easy to care but A&P doesn't care to be easy. A&P does care about you.
