COMMENT

Whether for better or for worse some thing have become so commercialized, they are not natural anymore. But there are some chickens in Rockfish that can sing and cackle and crow, and for those who do not know the difference a hen sings when she is happy walking across the yard, well she seems to be happy anyway, cackles when she comes off her nest and she clucks to her biddies. The natural rooster crows for daybreak, at the right time and any other time he feels like it, just like he is proud of himself.

Spinach is used most as a cooked vegetable, but it also makes a delicious salad. Most of the fresh spinach sold is a crumpled leaf or savory type. Look for rich, dark green color and clean, fresh leaves with no decay, advises Rachel Kinlaw, extension food specialist, North Carolina State University.

Snug-fitting lids on cookware hold heat in the pot and speed up the cooking process, thus saving energy. The temperature inside a covered pan can be as much as 20 degrees higher than in an open pan.

Byrd Promoted

James E. (Jim) Byrd, Jr., a native of Raeford, was recently promoted to manager for Southern Bell Telephone Company in Camden, S.C.

Byrd, the son of Mr. and Mrs. James E. Byrd, Sr., of Raeford, was a manager in the telephone company's business office in Charleston, S.C., before going to Camden.

The 1962 Hoke County High School graduate is a 1967 graduate of the University of North Carolina at Chapel Hill. Prior to joining Southern Bell's marketing department in Columbia, he taught chemistry in the public schools in North and South Carolina.

LACKS MARKET

Beef cattle production is expected to continue a gradual increase in North Carolina, according to North Carolina State University livestock experts, but there is a major road-block to major expansion. That is, the lack of a competitive market for slaughter cattle.
