Veteran's Corner

Q - I'm a service disabled veteran, and I have Veterans Administration Mortgage Life Insurance coverage on my specially adapted home. How long will this coverage last?

A - The insurance will cover your "wheelchair home" until the mortgage is paid off, the home is sold, or until you reach age 70.

Q - I'm eligible for the Veterans Administration health care program, CHAMPVA, because I'm a 100 per cent service - connected disabled veteran. My wife is entitled to Medicare. Can she have her prescriptions filled under CHAMPVA?

A - No. Dependents eligible for Medicare are not entitled to benefits under CHAMPVA.

Q - I was discharged from military service in 1965 before the current GI Bill was enacted, and my eligibility expired as of May 31, 1974 - eight years after the bill was passed. Does the 1974 law which extended GI Bill benefits from eight to 10 years for veterans separated between 1955 and 1966 apply to me?

A - If you hadn't exhausted your benefits by the former May 31, 1974 deadline, PL 93-337 (July 1974) extended them by two years, or until May 31, 1976.

New Program For CP&L

Carolina Power & Light Co. has begun a program of person-to-person contact to help explain rising electric prices, electric service billing, and how customers can use electricity most efficiently.

Called Project Communicate, the program is designed to supplement the company's continuing customer communications activities. According to CP&L district manager, A.J. Woody, the object of Project Communicate is greater public understanding of the use and pricing of electric service.

"Our customer service representatives are carrying out the program in addition to their regular duties," he said. "They are making contacts by letter and telephone to arrange small informal meetings in customers' homes. At these meetings, representatives will discuss electric usage and answer customers' questions concerning CP&L," he explained.

Tips To Keep Cool In Hot Weather

When it's hot, it's hot! So, let's face it, if you want to keep cool, learn a few simple tricks.

For starters, keep a cool head. Getting hot under the collar from anger steams you up even more than the weather. Roll with the pressures. Your blood pressure will benefit, too.

Keep a cool body by wearing light colored clothes which reflect heat. When outside protect yourself against the searing sun by wearing a porous cap that permits air to circulate freely around your head. Cut down on heat producing fatty foods by eating lighter foods and drink lots of liquids.

Watering down hot roofs and awnings and using an attic fan are also ideas to help you keep cool this summer!
