

Stonewall Report

By Mrs. H.J. Chason

Sunday School will be at 10 a.m. July 20, at Sandy Grove United Methodist Church. No morning worship service due to the pastor Gordon W. Ruggles and family vacationing in Ohio.

The U.M.W. met at Sandy Grove hut Monday night, July 6. Mrs. Ruby Beasley and Mrs. Willa Jones were hostesses.

Six new members were baptized at Ephesus Baptist Church in the new Baptistry Sunday night, July 13. The Baptistry was given in memory of Stanley Crawley and in honor of Mrs. Stanley Crawley.

Rodney Davis of Concord N.H. and Tony Ketchell and Toni Lynn Williford of Suitland, Maryland are spending the summer with Mr. and Mrs. Frank Davis.

Vacation Guide For Convenience

Did you know that better suntan lotions allow a person to stay in the sun longer with less risk of burning? That higher quality sunglasses eliminate 95% of bright glare? Or, that sunburn control and relief can be found in wet compresses, soothing lotions and creams?

Vacation-bound families should know such things and should make an effort to see that their vacation checklist is complete. From acne aids to vitamins I have a handy Vacation Checklist which includes 54 essential products for summer vacation needs.

So, be prepared. Stop by the store and check off your vacation-bound necessities. I'll have a number of suggestions for you.

Farm Items

By W. S. Young County Agricultural Agent

An embargo on swine from Texas has been placed in effect because of an outbreak of hog cholera near Hereford, Texas. It is important that we maintain a close watch against reintroduction of hog cholera into North Carolina. Growers should report any outbreak of disease in swine to their veterinarian or to the county agent's office. We have gone a long time without the disease, so let's keep it this way.

plant production. These things occur naturally in nature when certain conditions are met. This includes temperature, humidity, day length and many other characteristics. This week someone came in and wanted to know about the bright colored plums growing on some plants around town. After doing some investigation, I found that these are seed pods developing on camellia sasanquas. They can be dried when they are mature and the seeds planted. They will grow and will be the same type plant as the original one.

Seed pods are developing on all types of material, so don't be too surprised at anything you see.

There will be a demonstration of a mechanical tomato harvester on the Allen Curran farm near Rowland N.C. at 1 P.M. on July 17th. A rain date of July 24 has been set. The California harvester will be picking the Dorchester variety of tomatoes. They are processing tomatoes and have been treated with Ethrel to make them ripen all at once. They are expecting yields of 10-15 tons and presently they are selling for \$73 per ton.

Anyone interested in the demonstration is invited to come to the farm.

Dundarrach Head For CFF Named

Mrs. Jim Maxwell was named campaign chairman for Dundarrach for the Cystic Fibrosis Foundation. The announcement was made by Mrs. J. Russell Kirby, eastern regional chairman.

Upper Room

First the blade, then the ear, after that the full corn in the ear. (Mark 4:28)

During the autumn of 1942, midway between the evacuation from and the return to France, a British soldier was posted to General Eisenhower's planning headquarters. He noticed that the walls of his new office were covered with maps not only of occupied France, but also of the Normandy beachheads. This was two years in advance of D-Day. Outside in Trafalgar Square were chalked slogans which said, "Why don't they start the Second Front now?" This young soldier smiled to himself, for he knew a great secret denied to millions. It was all planned in the pipeline!

Sometimes we hear people say, "Why doesn't God answer my prayers?" God does hear and He does answer, even when it is no.

This is true of the harvest-- "First the blade, and then the ear, Then the full corn shall appear." It has all been planned, prepared, provided for!

PRAYER: We joy in Thy goodness, Lord, and thank Thee for that providence which supplies all our needs. Amen.

THOUGHT FOR THE DAY: Our heavenly Father knows best.

"Where Gourmets Gather"

Saving is simple. Banks make it complicated.

The razzle-dazzle schemes most banks give you make saving harder. Not better. Because most people save for very basic reasons. To keep their money safe—and to earn the highest possible interest. Which is the way we approach it at Southern National. We ask you a few questions. Then we suggest a plan with the highest interest the law allows. It's the best you can do. And you'll walk away with peace of mind. Instead of a headache.

Southern National.
A lot more bank for your money.

If you have to replace your old furnace this year...

If you're thinking about adding Central Air Conditioning...

INVESTIGATE General Electric's Weathertron® "HEAT PUMP" FOR HEATING & COOLING

This one remarkable unit cools your home in summer and heats it in winter! More efficient than ordinary resistance electric heating—provides 1½ to 2½ units of heat for every heat unit of electricity it uses depending on the outdoor temperature. No oil or gas furnace to worry about—needs no piping or flues—only one power source. The GE Weathertron Heat Pump operates by taking heat from the indoor air in summer and transferring it outdoors... from outdoor air in winter and transferring it indoors to maintain comfortable temperatures all year round automatically. It switches from heating to cooling and back again, as the weather dictates. Just set it and forget it!
