Many pharmacies have turned to Patient Profile Records to upgrade their services to the public. These record systems are not required by law, but for those pharmacies which wish to give professional service, Patient Files help to serve as an extra, watchful "eye" over all prescription usage.

From a professional standpoint and for your safety, if there's a possibility of drug interaction, we both want to spot it. Patient Profiles help us do just that.

So, if your druggist fails to offer this important service, switch your account to us and feel more assured knowing that a "third eye" is watching over your drug legend!

Safety First - Never share your medicine with anyone else, and do not take one prescribed for another person.
