Thursday, April 22, Home-makers District Meeting in Pembroke.

Monday, April 26, 9:00 a.m. Staff conference.

Monday, April 26, 7:30 p.m. Mildouson EHC at Community Building. Program - Civil Pre-paredness, Bill Niven, Hostesses, Mrs. W.W. Walker and Mrs. J.A. Jones.

Tuesday, April 27, 9:30 a.m. Rockfish EHC with Mrs. A.A. Ray.

CLEANING STAINLESS STEEL

Stainless steel is remarkably easy to clean. You can quickly remove fingerprints, dust and ordinary stains simply by rubbing the stain-less with a clean damp cloth and wiping sticky materials as burnt on grease, dried food particles and coffee stains, if you follow the suggestions offered below. With reasonable care, your stain-less steel will stay new looking for vears to come

years to come. *Cookware and small applia-

ances. To prevent food from hard-ening on your stainless unit, soak it in hot water as soon as possible after it is used. Then was it with any of the common soaps or detergents. If foods should harden on your

utensil, fill it with hot, sudsy water for a few minutes, then give it a gentle "rubdown" with a cloth, soft brush or stainless steel pad. On a highly polished, lustrous surface as a pan lid, a metal pad is likely to mar the finish and should not be mar the finish and should not be used. Always rinse in hot water and dry with a soft cloth. Detergents will help you avoid the film that soap sometimes leaves on stainless.

Foods that burn and stick can discolor. But with a stainless steel unit you can remove discolorations by applying a mildly abrasive cleanser such as Bon Ami. To soften an extremely heavy layer of burnt - on - grease, cover the layer with an ammonia - soaked cloth for 10 to 15 minutes. Then wash, rinse

and dry as usual. When hard water leaves a min-eral deposit remove this by swabbing or covering the bottom of the unit with a water solution contain-ing vinegar (about 25% by volume) or phosphoric acid (about 10% by volume. Follow with cleansing powder, then wash, rinse and dry. *Coffeemaker. An oil deposit may form inside your coffeemaker if it is not cleaned resultable.

if it is not cleaned regularly. To clean, fill your unit with boiling water, add a few teaspoonfuls of baking soda and let the solution stand for 15 minutes. Then empty the coffeermaker and ended the coffeemaker and wash as usual. If the oil is extremely heavy, a mild cleanser or ammonia may also be needed.

Precautions.

1. Strong bleaches tend to cor-rode many materials and should not come in contact with stainless sinks or utensils longer than 30 minutes. When these chemicals are used, the stainless should be rinsed

thoroughly. 2. Some foods, such as mustard, mayonnaise, lemon juice, vinegar, salt or dressings containing these, will attack and corrode stainless. You should never store them in

stainless containers. 3. Ordinary steel wool should be used sparingly to clean stainless;

EGG HUNT - Children at West Hoke elementary school donned colorful hats and garlands of paper flowers for a traditional Easter egg hunt Thursday

Mrs. Hunter Forbes, Miss Jean McCall and Mrs. Homer Terry returned home on Friday after visiting Mr. and Mrs. John McCall,

and Mr. and Mrs. Robert Terry in Coppers Cove, Texas. They also visited the L.B.J. Ranch and the

Dallas Furniture Market. Wednes-day they were dinner guests of Mr. and Mrs. Sam Bass in Birming-ham. Alabama. This was a three

weeks tour and they reported a good trip and the scenery was just beautiful, especially the blue bon-

nets in Texas. Mrs. R.J. Schook and son,

Jeffery of Vanceboro are spending

several days with her mother, Mrs. Hunter Forbes. Mrs. Homer Terry

of Rockfish visited them Sunday. Mr. and Mrs. Harold Taylor and

daughters of Charlotte and Mr. and Mrs. Chip Schalak of Fayette-ville spent Sunday with Mr. and Mrs. Tony Jackson and son, Ryan. Mr. and Mrs. Dannie McArthur

of Fayetteville were dinner guests of Mr. and Mrs. S.E. Sumner Satur-

day night. Mr. and Mrs. Fulford of Mc-Millan visited Misses Lib and Lois

Sumner, Mr. and Mrs. S.E.

Lumber Bridge News

By Lib Sumner

The attendance at The Baptist Church was very good Sunday. Services were at 9 o'clock and the sermon was delivered by the pastor, the Rev. Stacy A. Wells on "Christ The Victory".

Steve Chason of Raeford spent the weekend with his parents, Mr. and Mrs. T.C. Chason and Tony.

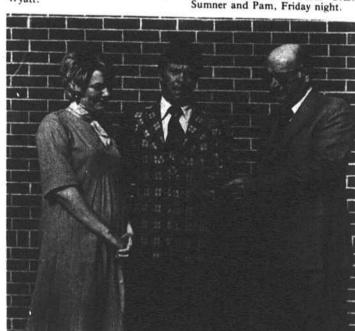

Mr. and Mrs. J.B. Williford and daughter, Pam of Siler City are spending several days with his sister. Miss Mildred Williford.

Mr. and Mrs. W. H. Schell, and Master Sergeant and Mrs. Billy Schell, Debbie Lynn and Billie Sue Schell of Goldsboro spent Saturday and Sunday in Charlotte with Mr. and Mrs. Harold Schell and family.

Mr. and Mrs. John E. Summer of Fayetteville spent Sunday with his parents, Mr. and Mrs. S.E. Sumner and Miss Pamela Sumner.

Sumner and Miss Pamela Sumner. Visiting Mrs. A.F. Tolar Sunday were Mr. and Mrs. Alfreda Tolar and daughters. Nancy, Kay and Ann of Red Springs, and Mr. and Mrs. John Cudd and Julie of Palaiab

Mr. and Mrs. Henry Byrd of Mullins, S.C. spent Sunday with her parents, Mr. and Mrs. Andy Wyatt.

Farm Items By Hoke County

Agricultural Extension Agents

The National Livestock and Meat Board has asked various government agencies and private medical groups to take immediate action in assuring the American public that both pigs and pork are neither the cause nor focus of medical concern regarding poten-tential influenza outbreaks. Since the influenza domain in the second second second second the influenza domain is a second the influenza danger is a human-to-human problem, they feel the term swine influenza is a misnomer and could have a negative impact on the

pork industry. There is no known probability of contracting the disease from eating pork. Transmission of influenza from swine to humans is a rarity. Public health and the American Medical Association calls it a swine-like influenza. Growers should inform people that there is no danger of eating swine products.

State and federal agencies are making every effort possible to eradicate witchweed from N.C. farms. This is a parasitic weed that attacks corn and sorghum and can attacks corn and sorghum and can live on many grass weeds such as crabgrass. It cannot grow without getting nutrients from these plants. It already has been eliminated in Anson, Lee, Wake, Pitt, Craven, and Wilson counties. The eradi-cation program will be underway in part of Hoke County this year. Farmers are encouraged to help these agencies and to use proper grass control in all their crops. The entire program calls for good grass control, the application of ethylene gas to make the seeds germinate and die and close inspection for excitence and die and close inspection for escaped plants. If this program is properly done, and no plants are permitted to produce seeds, there will be no witchward in the second will be no witchweed in theses areas after three years.

The management program for your tobacco plant beds should be at its greatest at this point. Plants have been damaged in the field and much resetting will have to be done. Good plants will be in demand.

Since most of the plastic covers have been removed, you should start your treatment for blue mold and anthracnose at once. You need to protect the plants and not let the diseases get started.

particles may lodge in the surface and rust. Allowing the wool to rest on a stainless surface may cause a rusty appearance. For difficult cleaning jobs such as removing burned - on foods, stainless steel "sponges" or pads are recom-mended. When cleaning a highly polished, mirror finish with a metal pad, be especially careful that it does not scratch the finish.

4. Gritty, hard abrasives will mar a stainless finish and are not recommended.

5. Sharp knives or choppers usually have hard carbon steel edges and will leave their mark on stainless surfaces.

Hoke County extension homemakers are sponsoring Mrs. Anne Wright's exhibit of historical sketches Sunday, April 25 in the assembly room of the new county office building, Magnolia St. The public is invited to come by between 2:00-5:00 p.m.

CANCER CHECK - Mayor John K. McNeill, Jr. (on right) hands over a contribution to the 1976 American Cancer Society drive to Mr. and Mrs. Allen Edwards, co-presidents of the Hoke County Cancer Society. Neighborhood canvassing is planned for next week.

Cancer Unit Organizes

The newly established Hoke County Cancer Board and the Raeford Junior Womans Club will head up the 1976 American Cancer Society fund drive here this month.

April has been designated cancer month and the local residential drive will be carried out April 26-30. Mrs. Phillip Nordan is chairman.

Officers on the county board are Mr. and Mrs. Allen Edwards, president; Mr. and Mrs. George King, first vice president; Mr. and Mrs. Julian Johnson, second vice -president; Mr. and Mrs. Palmer Willoox, treasurer; Mr. and Mrs. George Wood, secretary, Mr. and Mrs. Charles Hottel are in charge of memorials and Mrs. Lois Strother directs services. Mr. and Mrs. Dave Russell will direct publicity.

The local board will work to create better understanding of the county unit efforts, programs and services available to residents, and provide information about the entire American Cancer Society program

Hoke County has \$2,264 left over from last year's fund drive, but the surplus will have to be turned back over to the state fund if it is not used by August. The money is made available to cancer patients to help defray costs of medicine, bandages, travel expenses to and from berpitale and medicine. from hospitals, and overnight accommodations.

Mrs. Strother is establishing a screening program on applications for assistance. Cancer patients and their families should call the public health department and leave name. address, and phone number.

One third of the 665,000 Americans who are afflicted with cancer each year are alive and well five years after treatment, the American Cancer Society reports. The survival rate could be raised to one half through earlier treatment if more people heeded cancer's early warning signals and had regular checkups, the society says. ...

The handling of plants at setting time is most important too. This is the time that the mosaic virus gets started. Be sure your plant pullers do not smoke, chew or dip snuff while they are working. Dipping hands in milk every 20 to 30 minutes can be helpful. Get started right and produce a coord even right and produce a good crop.

Road Closes For Repair

Department of Transportation (DOT) officials will close to through traffic Johnson Farm Road (SR 1102) in Addor near the Moore

 Hoke County line April 26.
Repairs to the bridge, located over Aberdeen Creek in Moore County, will necessitate the closing of Johnson Farm Road for one week. DOT bridge maintenance crews will replace the bridge's floor and nailers.

Through traffic will be detoured over local roads in Moore and Hoke Counties.
