ACREAGE REPORTS REQUIRED FOR ALL FARMS

The Agriculture Committees of the Senate and House have reported out farm bills which provide that if a set-aside is implemented for the 1978 crops, the acreage required to be set-aside may be based on a percentage of the acreage planted for harvest in 1977. In order to provide the Secretary of Agriculture a full range of options in the event a 1978 set-aside is deemed necessary, 1977 acreages of wheat, corn, grain sorghum and barley will be obtained.

Farms which fail to file this acreage report will be considered to have zero planted acreage and may be ineligible for program benefits in 1978.

Farm operators or their designees should report all acreages planted to a program crop as soon as planting is completed.

REPORT DISASTER CONDITIONS

Farmers participating in the Upland Cotton, Feed Grain, and Wheat programs who plan to abandon crops planted on allotment acreage and damaged by natural disaster should have the crops appraised before putting the land to other use.

The disaster damage should be reported to the County ASCS Office. After any necessary appraisal has been made the acreage will be released by ASCS for other uses.

FLUE-CURED TOBACCO

June 14 is the final date for tobacco growers to report their planted acreage. Farmers who plant in excess of 110 percent of the effective allotment will not be eligible for price support.

It is very important that tobacco acreage be reported accurately and as soon as possible after planting is completed. If measurement service is desired the cost will be \$4.00 per farm plus \$1.50 per acre with a minimum of \$11.50 per farm. Anyone with questions regarding changes in the tobacco program is encouraged to contact the ASCS office.
