In any given year, high air pollution increases one's chances of dying by 20%. And air pollution costs each person \$65 a year in laundry, cleaning and painting bills, corrosion of materials, or boosted lighting bills, says Dr. Hollis S. Ingraham, New York State health commissioner. Some air contaminants are irritants; others are poisons. "We don't know the full effects of air pollution, but we do know that as air pollution increases, so do sickness and death", says Dr. Ingraham.
