Hoke ASCS News

Passage of this act authorizes various agricultural programs for the 1982 through 1985 crop years. Outlined are some of the topics of interest to our area.

	1982	1983	1984	1985
Wheat (bu.)	\$4.05	\$4.30	\$4.45	\$4.65
Corn (bu.)	\$2.70	\$2.86	\$3.03	\$3.18
*Upland Cotton (lb)	\$0.71	\$0.76	\$0.81	\$0.86

* or 120% of the loan rate, whichever higher

DISASTER PAYMENTS
Beginning with the 1982 crop year no ASCS disaster payments will be made to wheat, feed grain or cotton producers where federal crop insurance is available to the producer. However disaster payments could be made if declared by the Secretary that crop losses are too great to be relieved by crop insurance.

FLUE-CURED TOBACCO
Through this act it is intended that the tobacco support program be administered at no cost to the public other than administrative expenses. It also allows the Secretary to advise Congress of changes deemed necessary to achieve this goal.

Also changes pertaining to production of nonquota tobacco (Maryland) in quota areas has been revised. At this time Maryland tobacco when produced in an area where quotas are in effect by way of producer referendum will be charged against farm quotas.

BASIC FARM DATA
Farm owners and operators are urged to notify this office of any change in farm operation such as owners and/or operators, names and addresses and buying and selling of land.

CCC LOAN RATE
The interest rate changed by CCC on commodity and facility loans disbursed in January will be 12.25%. This new rate is down from 14.5%. The new rate reflects the rate charged CCC by the U.S. Treasury.

This new rate not only applies to loans disbursed after January 1st but also to outstanding and new farm storage facility loans which are subject to the variable interest rate.

1981 ACREAGE REPORTS
This past crop year most all producers certified their planted acreage of wheat, upland cotton, corn, grain sorghum and barley to the local ASC Office. Because the Agriculture and Food Act of 1981 has been enacted into law farm bases for these crops will be established beginning with the 1982 crop year. Any operator who had acreage devoted to any of these program crops but failed to report the acreage may still do so provided the producer is able to furnish evidence to verify the crop. Acceptable evidence such as sale receipts, seed receipts, and proof of payment for harvesting may be used to verify existence of the crop and its acreage.

In addition producers will be asked to pay the cost of determining that acreage reported. Producers wishing to file reports under this provision must do so by February 5, 1982.

Also because of the Agriculture and Food Act of 1981 producers who planted Oats in 1981 and 1980 are urged to report this acreage and the crop use to the ASC office if they have not already done so. The acreages are needed to compute farm bases and yields for use in 1982. Farm operators must file their reports by February 5, 1982.

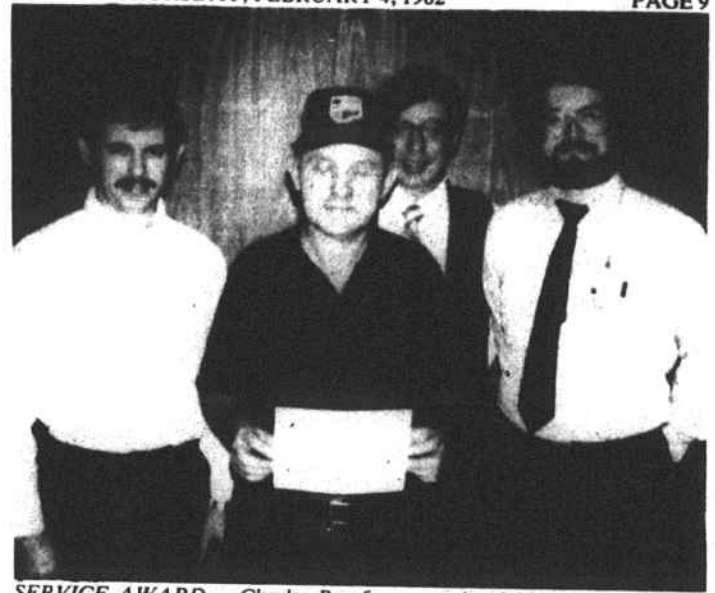

1981 PAYMENTS
All producers who received payments from this office in 1981 will be receiving a statement (Form CCC-182) in the mail sometime in January indicating the total amount paid to them through this office and reported to IRS. This form is provided as a service to you to assist in preparing your 1981 tax returns. It in no way replaces your responsibility to report any payments received to IRS. Please review this statement very carefully. Payments received are grouped by program on the form.
