

Mental Program

(Continued from Page 1)

money being allocated for this purpose.

We estimate the need for eight additional staff and a budget of \$200,000.

On numerous occasions, our Center has been contacted by individuals who wish to see us develop a methadone detox program. This project could be integrated with either the Mental Health Unit or the Hoke Hospital Unit. We perceive utilizing four beds for this purpose. We would utilize another four beds for persons dependent upon nonopioids.

The estimated cost is \$100,000.

A second project which could be developed on this campus is a moderate management group home. We recognize that the panel dealing with "Willie M." has been reluctant to develop programs on a state institution campus.

This would not be a state institution campus. It would be a regional campus which would include many other programs. Included in these programs would be a prevention effort.

By placing the moderate management group home at McCain Campus, we could develop training and prevention programs relevant to "Willie M.". The long-run effect would be to save money, better serve clients, and meet the needs of "Willie M.'s" and similar persons. It is our perception that an existing duplex could be utilized to serve six children. If this were not feasible, two of the three bedroom brick ranches could be so utilized.

We estimate the cost of this program to be \$120,000.

The next project we would like to place on this campus is the development of an inpatient "Willie M." program. It is possible that this project could serve the purpose of inpatient programming and serve that of providing high management training needs. We feel 10 children could be served. Existing rooms for use as time-out areas are available. Educational programs would need to be provided by the school corporation.

We estimate the cost of this project as being \$261,000.

For several years, we have noted the difficulties associated with placing mentally retarded and behaviorally disordered individuals within the program presently existent in Wake County.

We would propose to develop a new regional facility on the McCain Campus. Beds and facilities exist. At least 10 persons could be served within the existing structures.

The cost of this program would be \$300,000.

The fifth project which could be implemented on this campus would be a 20-bed mental health unit for individuals requiring more time in treatment than that presently available in the short-term program at Moore Memorial Hospital. This moderate-term program would reduce our utilization of Dix Hospital (in Raleigh) and be a major step in aiding us to deinstitutionalize.

If funds are available and sufficient, we would like to treat pre-teenagers.

The estimated cost for this program is \$297,000.

Another area of development is that of prevention programming. We perceive the state as being able to develop a state-wide prevention institute which would be a major step in developing alternatives to existing modalities of intervention, prevention, education and consultation in the areas of mental health, mental retardation and substance abuse programming. It is our belief that Ruth Relos would be an excellent person to be in charge of this facility. I have discussed this concept with her.

It is my perception that the state could bring in foundation support as well as existing and remaining federal support for prevention and research programming by making this facility a state-wide and perhaps national level prevention program.

This facility could be housed in a portion of the hospital itself, a portion of the administrative building, as well as the utilization of two three bedroom frame homes for use by students during their stay on campus.

An auditorium exists in the hospital which would be excellent for training and general resource sharing opportunities. This program would have to pay its own way and be under your direction or your designee's.

An additional proposal is to develop a training research program which would integrate with the state-wide prevention effort.

This project would be well integrated with that formerly described and would involve only a minor expansion of the Center's present Consultation, Education and Prevention Program.

We estimate the cost of this to be \$36,000 per year.

Our proposal to develop a comprehensive and innovative outpatient detoxification program could become a reality with our taking responsibility for the McCain Campus.

Also, a permanent location for

the Hoke Unit of Sandhills Center could be provided on this Campus.

We estimate that 100 persons would be seen in our outpatient detox in the first year. We continue to estimate that more than 200 persons would be seen each month in our out-patient mental health unit within Hoke County.

The total additional cost for these two programs being transferred to the McCain Campus would be \$30,800.

The above proposals are based on the assumption the state would provide the necessary new dollars in order for us to develop these programs.

We understand the dollars would remain with the McCain Campus to assure its continued existence. We would ask that any proposals endorsed by the state of the type described above assure us that we would receive free facilities and utilities, including telephone.

We would ask for \$650,000 per year in addition to those dollars needed to operate the programs.

These dollars would be utilized for the operation of maintenance, laboratory, food service, x-ray, EEG/EKG laboratory, and central supply. We would propose that the state take total responsibility for the operation and maintenance of the power plant and sewage treatment plant.

We would recommend that staff presently assigned to these two McCain facilities be reassigned to the prison staff component.

An additional \$313,000 would be needed to provide for food stuffs, linens, and general supplies needed in order to operate the abovementioned programs.

Further, there would be a need for expansion of administrative staff.

This would cost an additional \$248,000.

When one totals the cost of these programs, it is quick to note that approximately \$2 million in funds will be needed to maintain the McCain Campus and provide the numerous types of programs described above.

It is important to recognize that a number of these programs, for example "Willie M.", are already planned for funding and would not necessitate separate allocations by the Legislature or the Department of Human Resources. There would, however, need to be a significant additional allotment. (Our estimate is close to \$2 million.)

I would be very interested in reviewing our proposals with you and discussing their feasibility regarding actual implementation. I am available to meet with you at your convenience.

I have appreciated the opportunity to consider the option of developing a comprehensive and meaningful series of programs on the McCain Campus. I feel that the programs described above, if developed, would be a gold star for our state, as well as for our region and Sandhills Center.

I feel that we can be a trend setter and actually show how to save money during a period of decreasing revenues.

I recognize that there is an initial allocation that would be necessary but that, in the long run, more funds would actually be made available.

"Willie M." programs could be better served by integrating prevention, research and training with such programs.

Further, deinstitutionalization could take a giant step forward through the integration of programs within the McCain Campus and our five county catchment area.

Please note that our plan for the McCain Campus meets many of the objectives in our Annual, Deinstitutionalization and Strategic Plans. Also, the Prevention Institute and general goals to be accomplished by the aforementioned programs will meet needs articulated by North Carolinians at county level NC 2000 meetings.

Steven P. Dingfelder, Ph.D.
Area Director

TB Care

(Continued from Page 1)

The committee statement says, "There is still a need for the treatment of TB patients in North Carolina, and the committee feels that McCain Hospital is better staffed and equipped to provide this service in the state."

All people who support the move to preserve McCain Hospital are advised to write immediately to the Raeford-Hoke Chamber of Commerce, P.O. Box 96, Raeford, 28376.

The members of the committee are John Balfour and Danny DeVane, representing the county; Benny McLeod and Dr. Ramnik Zota, representing the city of Raeford; and Betsy Ann McNeill, representing the Chamber of Commerce.

Earl Fowler, executive vice president of the chamber, is the committee coordinator.

Lighthouse Poster, Exhibit Winners Named

The winners of the Save the Cape Hatteras Lighthouse Poster and Classroom Exhibits Contests were announced this week by Kay Thomas, chairman of the Hoke County Save the Lighthouse fundraising campaign committee.

The poster contest was held for students in the Fourth, Fifth and Sixth grades of the Hoke County schools. The Fifth and Sixth grades are in J.W. Turlington School only.

The winners are:

Sixth Grade: Most Original - Stephanie Monroe, Coley's class; Best Drawing - David McDonald.

Willie Moore

Budget

(Continued from Page 1)

commissioners with his wife, informed the commissioners that a new building would cost \$15,000 to \$16,000, which would just about be what it would cost to move the old building to another lot, and build a foundation for it. He also said that some damage in moving could be expected to plumbing and electrical systems in the old building, and expense would be involved in having them repaired.

On the other hand, John Balfour, chairman of the board of county commissioners, said older people in the community feel sentimental about the old building, indicating they would prefer to preserve it and move it, rather than see it replaced by a new building.

Merits of the old building also were brought up, and the decision was to inspect it. Balfour at the start of the discussion before Bundy made his suggestion made a motion that building be re-purchased and moved. After he and the other commissioners agreed to study the building, a new motion that the matter be tabled till it could be studied was adopted.

NEW ARMORY

The commissioners adopted a motion to appropriate \$838.37 as the county's share of the cost of installing a septic-tank system for the new National Guard Armory on Teal Drive. The state will provide \$838.38, and the federal government \$5,030.25, the remainder of the total cost.

The commissioners also were informed that the construction of the building is ahead of schedule, the interior finishing was started, and the final inspection may be made in 60 days.

Around Town

(Continued from Page 1)

Intyre, for over 20 years the head pressman for this organization died after an illness of approximately a month.

He was next to Mrs. Raymond Ellis, the oldest employee of Dickson Press in service. Since Paul and I have retired, these two were the senior members of this organization.

Harold was like this writer in one respect; he came to the paper straight out of high school. He did his job and worked well with all employees. The contribution that he has made to this firm can not be written down in this column but he will always be remembered by this writer.

Yes, I lost a friend in Harold McIntyre.

Have you noticed the ads in all the papers asking that interest rates come down on housing? If you haven't, look for these and clip them and send them to Congressman Rose & Hefner.

Barbour's; and Best Theme Interpretation - James Carpenter, Page's.

Fifth: Most Original - Willie Moore, Blackman's; Best Drawing - Sabrina Lynn Holt, Blackman's; and Best Theme Interpretation - Laura Osowitt, Blackman's.

Fourth: Most Original - Britt Bernhardt, Doby's, South Hoke; Best Drawing - Priscilla Carson, Tyler's West Hoke; and Best
