THRIFT SHOPS

182 135 Main St. & 401 Business

Tuesday, June 22, 1982, 9:30 a.m. -Rockfish Extension Homemakers

Club Meeting.

-12:40 p.m. - Business Girls Extension Homemakers Club Meeting.

Thursday, June 24, 1982, 5:00 p.m. - North Raeford Extension Homemakers Club Meeting.

Hint: Clean or replace air-conditioning filters at least once a month. When the filter is dirty, the fan has to run longer to move the same amount of air, and this takes more electricity.

LOOK TO THE FUTURE

Grocery store lay outs will be changing. Look for more spacious open display arrangements - this

sounds interesting.
Watch sugar prices - they might begin to creep up.
Chances are that coffee prices

will stay low.

Due to a big catch of salmon we might see lower prices. Shrimp carries a low inventory. Good harvest expected for lobster but we might not expect lower prices. Florida expects to harvest a big supply of scallops so prices should

be cheaper than last year.

Do you see some fresh fruits and vegetables (lettuce, cantaloupe, etc.) sold by the pound instead of the head or bunch - compare prices

of each method.

Have you seen unusual fruits and vegetables in your grocery store bean sprouts (consider sprouting your own) kiwi fruit, flown in pineapple (they are great) bamboo shoots (might collect your own right

here in the county), fresh mush-rooms (it is reported Penn, State has a bumper crop), jicama (I have not seen this) the Kohl rabi (this can be grown here in the spring March 1 - April 15, fall - Aug. 1. Sept. 1). Across the county the fresh feuits and reactables are fresh fruits and vegetables are being consumed at a high rate --due to the trend in diets. Are you?

Service Personnel

Master Sgt. William A. Conoly, son of Betty McDuffie of 111 E. Prospect Ave., Raeford, has been decorated with the third award of the Air Force Commendation Medal at Zwelbruecken Air Base,

West Germany.
The Air Force Commendation Medal is awarded to those indivi-duals who demonstrate outstanding achievement or meritorious service in the performance of their duties on behalf of the Air Force.

Conoly is assigned to the 26th Aircraft Generation Squadron as a jet engine technician.

His wife, Janice, is the daughter of Mr. and Mrs. Kenneth Frederick of Rt. 1, Aberdeen.

The Conoly's have a daughter,

Conoly is a 1968 graduate of Hoke County High School. Pvt. David L. Riley, son of John

W. and Jessie T. Riley of Raeford. has completed basic training at Fort Knox, Ky.

During the training, students received instruction in drill and ceremonies, weapons, map reading, tactics, military courtesy, military justice, first aid, and Army history and traditions.

He is a 1982 graduate of Hoke

County High School.

Marine Pvt. Kenneth N. Mc-Neill, son of Julie M. McNeill of Rt. 3, Box 71, Raeford, has completed recruit training at the Marine Corps Recruit Depot, Parris Island, S.C.

During the 11-week training cycle, he learned the basics of battlefield survival. He was introduced to the typical daily routine that he will experience during his enlistment and studied the personal and professional standards traditionally exhibited by Marines.

He participated in an active physical conditioning program and gained proficiency in a variety of military skills, including first aid, rifle marksmanship and close order drill. Teamwork and self-discipline were emphasized throughout the training cycle.

AWARDS DAY -- Friday was Awards Day for these Fourth Graders of West Hoke School. It was their last day of classes at West Hoke. Next school year they'll be J.W. Turlington School students, unless they go to school outside the county. West Hoke Principal Milton Williams presented the promotion certificates, and members of the faculty presented the

Exceptional Children Given Cookout Here

The exceptional students of Mrs. Pearlie Kemp Brown's class from Red Springs Middle School, Red Springs, experienced an enjoyable outing at the home of Mrs. Brown in Raeford on Wednesday, May 19.

The students enjoyed a tour through Mrs. Brown's home, pausing first in the family room for a musical rendition and various games. As a learning experience each student shared in cooking the food at the cookout.

The menu consisted of hot dogs with chilf sauce, mustard and catsup, hamburgers, potato salad. potato chips, ice cream in cones, tea and punch.

Mrs. Brown's children -- Karen, a recent N.C. State University graduate presently an architectural engineer employee in Kansas City, Mo., John, a 1982 UNC-Chapel Hill graduate, employed in Chapel Hill, and Valinda, a rising UNC-

Chapel Hill senior and Vita, a friend of John's, who is also a 1982 UNC-Chapel Hill graduate, were available for giving assistance and helping to supervise the students.

Mrs. Brown says the outing was a real enjoyable learning experience

Hoke Agricultural Extension News

by Willie Featherstone, Jr., Agricultural Extension Agent

Turf, whether on roadsides, golf courses, city and state parks, or home lawns, is important to everyone Surveys in many states show that planting and care of lawns and other turf areas rank near the top of all agricultural activities.

The total "outdoor living" mar-ket amounts to over \$6 billion dollars annually. Successful turf establishment and maintenance re-quire implementation of the principles of integrated pest management. This includes strategies for optimum crop management as well

as mangement of pest populations. It involves the knowledgeable use of cultural, biological, and chemical mangement practices that are economically, ecologically, and so-cially sound for both the short and long term. Most turf management practices affect pest populations and their natural biological control

systems in some way.

The importance of particular pests and their damage varies with different turf areas. Economic thresholds vary correspondingly. For example, more intensive man agement can be used on golf green than on lower maintenance turf areas such as fairways and certain

Site Selection and Preparation: Selection of good sites and proper preparation of soil before planting turfgrasses can prevent many pest problems. Good soil drainage is essential for good plant growth and helps prevent many pest problems. Soil mixtures developed specifically for certain types of turf areas can aid soil drainage. They help pre-vent rapid compaction of the soil and reduce the pobability of weed invasion. Removal of trees and shrubs may improve both soil and air drainage and eliminate competition from tree roots and potential future shade problems.

Since most turfgrasses used in Hoke County as well as in North Carolina are not native to the continental U.S., soil modifications of the entire potential rootzone of correct pH and nutrient deficiencies are necessary to obtain a desirable stand of grass. This requires soil testing before a new turf is established.

The recommended soil amend-ments (lime and fertilizer) should be broadcast evenly over the soil surface and incorporated into the top 6 to 8 inches of soil. The area then should be raked or harrowed to make it as smooth as possible. Soil in intensively managed areas may be sampled every 2 or 3 years, and amendments added as recom-
