Grapplers Split Matches

In the wrestling match held last Tuesday night, Hoke visited and clipped the wings of the Douglas Byrd Eagles. With the help of three Douglas Byrd forfeits, Hoke won by a score of 46-20.

Marvin Pequese, in the 119 pound weight class ran his season record to 3-0, when Douglas Byrd forfeited his weight class.

Also receiving forfeits for Hoke were Billy Locklear, in the 98 pound weight class, and Ricky Allen in the 132 pound weight class.

Winning by decision for Hoke

Take Care With Jump Starts

"When I jumped a dead battery in another car from the one in my vehicle, that dead battery exploded with a tremendous roar. Luckily, I was standing off to one side and wasn't hurt ...

Each year, the National Society to Prevent Blindness -North Carolina Affiliate hears numerous stories of similar narrow

escapes. "Not all of those people who write us are this fortunate," says Marion L. Johnson, Executive Director of the North Carolina Affiliate.

According to the Society, more than 12,500 people suffered a battery-related eye injury in 1981 that required treatment in a hospital emergency room. Ninety percent of those injuries were preventable with the use of protective evewear.

"This winter has been predicted by many to be the coldest in years," comments Miss Johnson. 'As icy temperatures grip North Carolina, it is important that motorists carry protective eyewear in their cars, and know the correct way to jump-start a dead car battery.

The Society suggests that safety goggles be stored in the automobile year-round, and worn when jumpstarting a battery or doing other eye-hazardous activities, such as changing a flat tire. "An exploding car battery can discharge casing, tool bits and chemicals into the eyes," Miss Johnson explains, "and safety goggles can prevent this material from ever reaching

the eyes." When jump-starting a dead car battery, the Society suggests the following procedures:

Before attaching cables: *Put out all cigarettes and

flames! *Make sure cars don't touch. Set

both cars' parking brakes and automatic shifts to PARK (manual transmissions to NEUTRAL). Turn ignition OFF.

*Add battery water, if needed. REPLACE CAPS, cover with damp cloth. Don't jump-start if fluid is frozen!

*Do not jump-start unless both batteries are negatively grounded and the same voltage. American cars are either 12-volt or 6-volt. Check owner's manual.

Attaching the Cables (Do in order listed):

*Clamp one jumper cable to positive (+) pole of dead battery. Then clamp cable's other end to positive (+) pole of good battery.

At good battery, clamp second cable to negative (-) pole. Then clamp cable's other end to dead car's engine block on side away from battery.

*Start car with good battery --

was Tyrone Jackson, in the 126 pound weight class; Darrell Andrews, at 138 pounds; and Orlando McKinnon, at 167 pounds.

Hoke had three of its team members to win by pins. Dexter McRae, at 155 pounds; Robert Moody, at 195 pounds, and Darell Kelly, at heavyweight.

This win made the season record 2-1 for the Bucks.

The Bucks were not so fortunate on Thursday night as they fell to the Wolverines of Westover by a score of 59-6.

Hoke High Runners Place In SC Race

Three members of the IEA Road Runners received awards in the Holiday Half Road Races held in Anderson, South Carolina on Saturday.

The races were sponsored by the Anderson Road Runners. In the 5K (3.1 mile) race, Allen

Ray Jacobs placed first in the 12-13 year old age division.

Allen ran the course in 18:38 under severe weather conditions. Allen placed 9th overall in the

race with 208 registered runners. Don Woods also ran in the 5K race and placed 21st overall and 6th in the 14-18 year old age division.

In the one mile race, Keith Locklear placed 4th in the 14-18 year old division and 9th overall in a time of 5:53.

Donnie Henderson placed 5th in the same age division and 10th overall in a time of 5:54.

There were 78 runners in the one mile race.

195 pound weight class.

his Westover opponent.

Buck's season record to 2-2.

has been awarded a \$125 dent, Raeford Kiwanis Club Sophomore Scholarship and has been nominated to attend the 1983 North Carolina Leadership Seminar of the Hugh O'Brian Youth Foundation. The seminar will be held on a weekend next spring during the period April 1-June

THE NEWS-JOURNAL RAEFORD, NORTH CAROLINA SECTION I, PAGE 9 THURSDAY, DECEMBER 16, 1982

BUCKS LOST -- Hoke High's and Westover High's wrestlers met Thursday on the Hoke mats, and the visitors won the meet. Here is a scene from one of the matches.

Harold Thompson in March 1980 photo when he was playing center for Hoke High.

SECOND TEAM -- Lee McNeill of Hoke High has been named to the second team All Southeastern 4-A Conference defensive end for his work through the 1982 football season. During the season he made 114 individual tackles including 15 sacks of quarterbacks. His choice for the all-star squad was made by unanimous vote. He also was named Cape Fear Region Player of the Week following the Bucks' upset of Pinecrest.

Ex-Hoke Star Thompson Saves NC State Victory

Former Hoke County High School basketball star Harold Thompson was the man who clin-ched North Carolina State University's basketball victory over Michigan State Saturday night.

Wolfpack Coach Jim Valvano sent Thompson, 6-foot-5, into the game with only 17 seconds to go to prevent Michigan State's 6-foot-2 Sam Vincent from taking the tying shot. With 17 seconds left in the game, Thompson tipped an in-bounds pass away from Vincent to guarantee State's win, 45-41. State, ranked 18th in the nation going into the Michigan State game, moved to 15th this week. Valvano said after the game, "If? we gave away game balls, we'd

give one to Harold. He always comes off the bench and gives us his best."

Thompson had been in the game shortly before his game-saving ac-tion and had covered Vincent effectively, preventing him from getting off a decent shot. Altogether, Thompson played about a minute of the game.

Thompson is a State sophomore and was Hoke High's leading scorer before leaving school by graduation in 1980.

then start the disabled car.

*Remove cable from engine block and other car's negative pole. Then remove cable from positive poles.

"Safety goggles should be worn at all times when jump-starting a dead battery," the Executive Director adds.

The Society has available a bright yellow vinyl sticker that lists these jump-start procedures. The sticker can be kept in the glove compartment of the car or affixed onto a clean surface under the hood.

ing 1,000 residential customers the opportunity to compare the timeof-use rate with the standard rate. Under time-of-use rates, electricity costs less during off-peak hours and more during peak hours. While the goal is to limit the use of electricity at times when demand is high, these rates offer customers who are able to shift the majority of their electrical usage the opportunity to save on their electric bills, according to John S. Monroe Jr., manager of CP&L's Conservation & Load Management department.

Peak hours from October

a.m. to 10 p.m. CP&L will install special time-

of-use meters at no charge on homes of customers who volunteer for the program. Any residential customer who has used a minimum of 1,000 kilowatt-hours during at least three of the last 12 months is eligible to volunteer.

Following installation, for 12 months the customer will receive a sample time-of-use bill in addition to a regular electric bill. While the customer pays only the regular bill. the sample bill provides a comparison of costs on the two different rates.
