"WITHHOLD 10% OF MY INTEREST INCOME? YOU'VE GOT TO BE KIDDING!"

We're not.

Starting in '83, the federal government will be getting a raise...from you! A new law requires withholding 10% of the taxable interest and dividends you receive from savings and loans, banks, credit unions, money market and other mutual funds, corporations and federal, state and local governments.

But that's not all.

There will also be withholding from pension, profit sharing, annuity contracts, other deferred compensation plans and Individual Retirement Account disbursements (unless you take the time to request otherwise.)

Of course the real cost to you is even more—in time, in lost interest compounding and lost privacy. Plus, the added costs to the financial industry will ultimately be passed on to the public.

Sure, some folks who meet specific age and income guidelines can receive exclusions from this law, but only if the proper forms are completed for each and every payer. In completing each form you will divulge information about your age and income you never had to give out before!

Makes you wonder...whatever happened to saving incentives?

We think Congress should take another look at this withholding scheme.

If you agree...if you don't want your interest income reduced by this 10% plan, write your Senators and Congressman. Let them know how you feel. That this plan should be repealed.
