## Healing in nature

Ever wonder why getting outdoors feels so good? Studies at Stanford University show that in the presence of nature's beauty, blood pressure goes down,

heart rate lowers, and stress hormones drop.

Even hearing pleasant music causes the release of endorphins, the body's natural pain killers, which may also be important in strengthening the immune system.

Enjoying good health is the most "natural" thing in the world, and at our Pharmacy, your good health is our goal!
