### Notes.

The "Southern" of Knoxville is the oldest and by far the largest general association in the south, and is also the largest association in America.

It has 500 branches in 18 states. It is, in effect, a league of 500 local associations. All these associations must fail before the association can fail. Therefore, failure is impossible.

The "Southern" has turned over from the expense fund to the loan fund \$12,000 in five years. No other association has even approximated such a record.

The actual running expense per share is less than in any other association, and on cash handled much less than the majority of the large financial institutions of the country.

The feature of an unapportioned reserve, providing against losses and insuring the perfect equality of all stockholders, will be appreciated, for the interests of the many cannot be sacrificed for the benefit of a few.

The by-laws forbid the sale, or the use as collateral security, of any of the securities belonging to the association, and require all securities to be kept on deposit in the name of the association with the State Treasurer or approved trust companies.

## IMMENSE DAMAGE

### Done by the Cold Snap in this State.

Specials published in today's Richmond Dispatch give the following news of the damage by the bitter weather:

At Winston as far as heard from the cold snap has not wrought injury to tobacco plants, the beds being protected by cloths. All early fruit and vegetables are killed, and even the foliage of the shade trees is blighted. It is feared that the wheat crop has sustained serious damage.

At Rocky Mount reports from farmers as to the damage to tobacco are conflicting. Some say it is considerable and widespread; others, that it is slight. R H Ricks, the largest producer in Eastern North Carolina, says the plants are not damaged at all.

At Durham the killing frost has nipped the buds and caused the blooms of fruit trees to fall, and the gardens will have to be replanted. So far as heard from tobacco plants are unhurt where they were covered with cloths.

At Asheville the mercury went down to 11 degrees. It scored 15 the night before. Peaches have been killed, and it is believed that the apple crop has been badly injured. A good many tobacco plants have been killed, and some planters are buying seed for sowing their beds. There is time for a new crop of plants. No great permanent injury to tobacco is feared.

At Henderson the cold wave has played havoc with the fruit and other crops. The peaches, apples and vegetables are all killed. Some of the wheat and oats are killed. Clover is lying on the ground, black. All tobacco plants in exposed places are destroyed, and some in beds with cloth covers on them. Only the very small plants under cover are considered safe. The leaves on the trees are killed.

Reports from the Wilmington section are very disheartening. They tell a story of widespread disaster to the truck, nearly all vegetables above ground being destroyed. A conservative farmer estimates the damage along the line of the Wilmington & Weldon R R between Wilmington and Goldsboro, a distance of 84 miles, as at least \$100,000. Telegrams were received today at the headquarters of the Atlantic Coast Line in Wilmington, from all points on its extensive system of roads, and all of the same tenor as to the terrible effect of the weather. A high official of the Coast Line estimates the damage in the sections traversed by the roads of that system at not less than \$1,000,000.
