"Great heavens, what are we coming to?" said a gentleman yesterday who had been around with a party of young men. "The boys are parting their hair square in the middle, the girls wearing double-breasted vests like boys and the next thing I expect to see is the boys wearing dresses and girls breeches." To our friends enquiry we will say that we have managed to get along with all such innovations and suppose we can survive. As to girls wearing "breeches" there are numbers of cases where married women have done so—at least it has so appeared.—Greensboro Record.

An ingenious inventor has provided himself with a pair of bicycles for his feet. The wheels are about four inches in diameter, and are strapped to his feet like skates. Brought Back for Trial

Geo. Arkle, a prominent citizen of Wheeling, West Virginia, was brought to Whiteville, N. C., several days ago charged with larceny. The case as will be remembered, is a very peculiar one. Arkle while traveling in North Carolina picked up a pocket book on the car which had been dropped by a gentleman who lives in the eastern part of the state. When Arkle returned home he notified the gentleman that he had found the purse and claimed \$200 of the \$2,400 which the pocket book contained, this the gentleman refused to do and Arkle refused to give up the money. Proceedings were then started charging Arkle with larceny. Gov. Carr then sent requisition papers to West Virginia and a big "habes corpus" was held there a day or so ago. The case went against Arkle and he was sent to Whiteville for trial. Arkle is a well known and prominent citizen of Wheeling and his arrest has created quite a sensation. A big legal squabble is expected when his trial comes off.
