W. G. Atkinson, governor elect of Georgia, was only 10 years old when the war ended.

Baltimore voted on Tuesday, by 25,678 to 11,121, to spend \$4,000,000 to extend the city water works, acquire new parks, and to go on with the construction of a new court house.

The United States paid Germany is 1893 \$9,475,000 for sugar, and the amount this year will exceed \$11,000,-000. This is but a small fraction of the cash sent abroad for an article that, with a little encouragement, could all soon be produced at home.

Russia has more than twice the area of the United States, is nearly twice as populous, and its annual increase by births is 2,000,000, compared with 700,000 in this country. The grea race between compact nations of white people is apparently to berun be tween Russia and the United States.

The Chinese are said to be waiting until some of their imperial halls and ancestral tombs fall into the hands of the Japs, which will be accepted as a sign that the present dynasty has reached an end. Military men who are watching this war in the east find it as instructive as a comic opera.

There is one lesson of the wonder ful political transformation just effected which must not be lost sigh of in the natural republican exultations of the hour. That lesson is that no victory, however sweeping, is too great for the people to reverse if they are disappointed and disgusted with the results thereof.

FiThe labor troubles on the leves at New Orleans have now reached the first stages of settlement. The white men who load vessels with cotton must either show their hand by attacking the colored laborers in force or remain inactive and let non-union labor capture all the cotton work of the port.

Miss Doria Kemp is one of the luckiest young women in the world, She went out to sketch in the hills of old Mexico, and while looking for a brook, fell into a bed of gold nuggets. She jumped from poverty to comparative riches in the twinkling of an eye. Her find netted her \$9,700. Miss Kemp is now in Paris, France, where she proposes to study art, in the hope of becoming a great painter.

Japan's object now is to humiliate China and force it to pay a large war indemnity. If possible China will be crippled and weakened by dividing it up into independent provinces, with separate and distinct governments one from the other. There will be no letting up until Pekin is taken and the Chinese emperor either captured or driven from his palace.

> At the Cramp shippard at Philadelphia today the great passenger steamship, St. Louis, was laun-hed. The event is of national importance from the fact that it is the first steamer of that size and a transatlantic liner ever built in the United States. At the launching ceremonies president Cleveland and members of the cabinet were present and took part. Mrs. Cleveland christened the vessel.

The greatest of all the congressional landslides of the past are far exceeded by the mighty avalanche which has just taken place. When the demoerats in 1874 changed a republican majority of 105 elected in 1872, in Grant's second canvass, to a lead of sixty for their side, they achieved a revolution which still stands as one of the marvels of our politi s. Yet the change made last week was even

While the czar's body was in the church in Yalta, on the eve of departure for Moscow, says the Central News correspondent, soldiers and eivilians crowded round it to bid it adieu. They kissed ardently the to delay in emisliming, the face was blue and showed signs of decomposities. All at Bragassa's tion. The ceremony of bidding the ezar adieu is regarded as a sacred right of the people, and will be repeated in Moveow and St. Petersburg. In Yalta even foreign princes were compelled by Russian custom to kiss the dead man's cheeks.

Once inside the gloomy walls the black man has no possible chance of escape, and he delves like a galley slave until his six months have expired. Then he is for people suffering with bronchitical paid off, and the entire delegation from one tribe marches home across the desert in a body. It is seldom that a black is seen a second time in

The Siberian Railway.

The Siberian railway has now been opened to Omsk, 2,300 miles from St. Petersburg, and it is possible to go from one place to the other in four and one-half days in building part of the line, and men had often to carry their food with them, and sometimes had to be lowered in baskets in order to prepare the track. In draining a bog sixty miles wide, both engineers and men had for some time to live in huts built on piles, which could be approached only in boats. Mosquitoes were so plentiful that the workmen had to wear masks of which 4,000 were bought for the purpose.

Tore Out His Tongue.

LOUISVILLE, Ky., Nov. 11 .- While crazed from the effects of a protracted spree, Peter Pepper, a barber, an in mate of the city hospital, last night grasped his tongue in both hands and tore it partially from his mouth. An attendant discovered the suffering man, who was still tugging away at his tongue. All efforts of the hospital surgeon to save the man's life were unavailing, and he died shortly after, in intense agony.

Explosion of a Meteor.

RAHWAY, N. J., Nov. 10 .- Last night the residents for miles around this city were awaked from their sound slumber by what seemed to be the firing of a cannon. The affair caused much excitement, and it was hours before the real facts were revealed. A meteor exploded with terrific force in upper Rahway, landing on an old building.
