 ROBERT L. GRAY, CITY EDITOR

RALEIGH, N. C., FEBRUARY 23, 1895

A woman's suffrage bill was passed by the Washington state senate.

The Missouri house has passed a bill to remove the capitol to Sedalia.

The less the country hears of congress from March 4 to December 2 the better it will be pleased.

Washington was first in the hearts of his countrymen yet he was a boss, and carried a hatchet up his sleeve.

The increase in the treasury gold will knock out the hoarders. Gold will not be allowed to go to a premium.

The wild rush from Indiana for the late minister Gray's place before the corpse was in the ground didn't please the president.

Railroad earnings throughout the country are showing an improvement since January 1. They are a fair index of trade.

The decorations bestowed on Li Hung Chang by the emperor of China do not appear to have included a life insurance policy.

During the year ended December 31, 1894, there were 20,803 patents granted, Connecticut contributing the largest percentage.

A new proposition in New York city is to have a careful census taken annually, as is the custom in most of the large European cities.

There are \$350,000,000 and more in New York savings banks alone. Would owners of this money buy United bonds at first hand? Rather!

The Pennsylvania senate has passed a bill to compel every school house in that state to hoist an American flag made of the American materials.

A Sicilian monk has invented a typesetting machine which will set 50,000 letters an hour. The operator uses both hands and composes entire words simultaneously.

The Japs have set Corea to rights and are doing well with their job of house cleaning in Asia. It is a large contract, but the fiery little men have given no sign of a fitted freling.

In New York city only one family in fifteen owns the house it lives in. The figures in Boston and Brooklyn are one in five and a half and in St. Louis one in five, or near the same as in Philadelphia, which is called "the city of homes."

A rising in Egypt is predicted for Tuesday, says a dispatch from Cairo. The outbreak has been foretold in Mohamedan fanatical circles for the Raahdan, the great annual feast of the sect. The rumors as to the condition of affairs in Egypt are causing uneasiness.

The strike of the building trades at New York in sympathy with the electric wiremen bids fair to surpass any other in the history of these organizations there. It is not improbable that it may affect nearly 100,000 men. The board of walking delegates controls 2,000 men, all of whom will doubtless be called out. With these over 60,000 mechanics, who are in no way affiliated with the organizations represented, will be dragged out. Outside of the electric trade, the contractors in the

building trades have had no differences with their men, but will feel the effects of the strike just the same. It is said that the strongest influence has been exercised with the electrical contractors to propose suitable terms of settlement to their men. The state board of mediation and arbitration may be called in with a view of settling the difficulty.

The only favor that the country asks of this congress at the present time is that it will pass the appropriation bills at the earliest practicable moment. As has been usual in recent years, the senate is behindhand in this work. Three of these measures are still to be considered in that body, and several others are before it in some stage.

**Old People**  
 Old people who require medicine to regulate the bowels and kidneys will find the true remedy in Electric Bitters. This medicine does not stimulate and contains no whiskey or other intoxicant, but acts as a tonic and alternative. It acts mildly on the stomach and bowels, adding strength and giving tone to the organs, thereby aiding nature in the performance of the functions. Electric Bitters is an excellent appetizer and aids digestion. Old people find it just exactly what they need. Price fifty cents per bottle at John Y. MacRae's drug store.

**Pity 'Tis 'Tis True.**

Correspondence: And now is presented the spectacle of the chairman of a subcommittee on printing appointed to ascertain the "lowest bidder"—in the presence of only one of the bidders—(two of said committee being the representatives from his county and district)—all others being excluded—attempting with the aid of a foot-rule to ascertain the amount of type in a page of printed matter—the rule being furnished by the privileged bidder. This is the chairman who would award the contract for printing—this the "practical printer" who would do the state printing!

We suggest you go to Backwoods township, Forsyth county, secure a fence-rail and measure with that—it would at least possess the merit of being adapted to the hands of the aforesaid.

The endeavor to make figures suit one's expressed intentions, when it is a well-known fact that figures possess the qualification of being extremely truthful, is one that might puzzle the brain of a born mathematician; but when the effort is made to make a higher figure represent a lower quality, for the benefit of a beloved constituent, it's no wonder the chairman gets red in the face, and the aforesaid constituent adorns his classic features with a puzzled expression. 'Tis true, and pity 'tis 'tis true! SMITH

**The Discovery Saved His Life.**  
 Mr. G. Caillouette, druggist, Beaverville, Ill., says: "To Dr. King's New Discovery I owe my life. Was taken with the grippe and tried all the physicians formulas about, but to no avail and was given up and told I could not live. Having Dr. King's New Discovery in my store I sent for a bottle and began its use and from the first dose began to get better, and after using three bottles was up and about again. It is worth its weight in gold. We can't keep store or house without it." Get a free trial bottle at John Y. MacRae's drug store.

"I would rather trust that medicine than any doctor I know of," says Mrs. Hattie Mason of Chilton, Carter Co., Mo., in speaking of Chamberlain's Colic, Cholera and Diarrhoea Remedy. For sale by J. Hal Bobbitt, druggist.
