THESE ACTS NEVER PASSED.

Yet They Were Recalled From the Office of Secretary Coke.

In the office of the secretary of state is a letter signed by president Doughton of the senste and speaker Walser of the house and sent early in the session of the legislature The letter is as follows : "To the secretary of state: You are requested to return to J. M. Brown, enrolling clerk, the following acts and resolutions, ratified January 29: Au set to incorporate David lodge, No. 118, I O.F; an act to amend chapter 1,117, section 1, laws 1893; an act to amend section 1,114 of the code; a resolution authorizing the committee on propositions and grievances to appoint a sub-committee. For correction." These acts and this resolution had never passed the senate; had never even read in that body. They were ratified and signed. Yet they were returned to the enrolling clerk as requested. Two of the acts returned afterwards passed the senate. Chief clerk W. P. Batchelor says the latter recalling them will be published with the laws of 1895. Here is a case which bears directly on the "assignment" act which as is well known never passed the senate and was never before that body.

In the supreme court in the case of Wyatt vs manufacturing company, (one of the ten assignment cases) judge Clarke filed a dissenting opinion saying: "Surely the supreme court is a competent tribunal to decide whether the signatures to a piece of paper were knowingly and intentionally affixed by the speakers with the assent of the senate and house, or whether the bill had been defeated on its attempted passage and notwithstanding such defeat the signatures and certificate of the speakers had been thereafter procured by a bold and shameless fraud. Reduced to its last analysis the question is simply whether legislatures shall legislate, and whether the time honored institation of "twelve good men and true" shall be trusted to declare, upon the testimony of the presiding officers of the two houses, that a gross fraud was perpetrated on them in procuring their signatures to a bill which had not been enacted by the two houses, but had been tabled. It is not an occasion when public policy or individual rights can tolerate the suppression of an investigation. The in ve-tigation should be full, free and searching. "The lights should be turned on," not off." Nothing that is honest and pure and of good repute need fear an investigation. Others have no claim to be protected from it." Judge Avery concurs in this dissent.

MAY WEATHER.

After all the Month Was a Cool One.

During May here the mean temperature was 65 The highest was 98 on the 31st, the low est 41 on the 15th. The mean temperature for May during the past 9 years is 68 degrees so the month was cooler than usual. The rainfall was 3 34 inches. Rain fell on 16 days. The average rainfall for May for 9 years past is 5.34 inches. The accumulated deficiency of daily mean temperature since May 1st, 77 degrees, average daily deficiency .25 degrees. The accumulated deficiency of daily mean temperature since January 1st, 4.68 degrees; average daily deficiency 3.1 degrees. This is very remarkable,
