CRITICAL IN CUBA

Now Enjoying Anythin: But

Nashington, D. C., Monday, Sept. 12. Senor Eugenie Marie Hostos, the President of the newly formed Peurto prominent Peurto Ricans in this country and well known through the entire Spanish speaking world for his writings has written an open letter to his countrymen defining their status with regard to the annexation of the island to the United States and impressing upon them their duties in their new relation. In the letter Senor Hostos

"COMPATRIOTS,"

The Peurio Rican Patriotic League which has just been founded and in whose name 4 thus address you has two objects in view; the first is to place our mother island in a condition wine, we will be in touch and sympathy with the itnerests of the United States of America, and so and to educate our scople in the exercise of those libertics and blessings which they are to receive both in private and public life, individtailly, collective, economic, political social and material in their new condition, it would at first appear that there had nothing passed or was about to pass than a change of government from that of Spain to the United States, but there is far more. The constitution and its and customs of the people, their sense of justice, their equality and libcrty which has served as a basis for the oundation of this American confederation, are to become ours in part, and v ate to enjoy tike biessings. suffering Cuba, and the end is not yet, for we are as it were between two fires, we must keep peace because the United States and Spain are no longer engaged n active strife, and we must endure all the atrocities, cruelties and barbarism imposed upon us by the Spaniards, worse now that before the signing of peace measures, because they realize that they must soon leave our island and they desire to heap all the vencance upon us that it is in their power to do. Chaos reigns in Havana. The public service has in nearly all departments been practically abandoned, and the employes thus being thrown out of their positions take the more from us, and what is true of the civil authorities is double true of the military commanders and the soldiery. The industrial public is completely paralyzed. All anmais, all horses have been taken away to meet the necessities of the Spanish army. There is nothing for the laboring people, for the poor classes, the arge majority of whom are Cubans, to do. Matters have not improved for them since the raising of the blockade.
