Col. John S. Cunningham has resigned as President of the State Agricultural Society and Mr. Richard H. Battle has been chosen as his successor. Col. Cunningham has made an excellent President and is entitled to the admiration and gratitude of the entire State. Mr. Battle has served before and made an excellent record.

How much will a woman stand from the man whom she has promised to houor? His brutality will go unpunished if her voice is required to seal his guilt. From thoughtful observation the divorce laws in North Carolina do not seem too lax. At the July term of the court only two divorces were granted and from daily illustrations the number should have been pearer thirty. At the March term twelve divorces were granted.

What better sign can the public desire of the manifest prosperity of a city than the fact that the banks have more money than they can loan? What excuse can be found for any enterprising, honest man embarking in an industry here when he can secure abundant capital on any reasonable security? There are hundreds of industries Raleigh needs and now is the time to begin. There is no indication of any contraction of the money supply here.

One of the best things done at the meeting of the State Press Associlation last week was the adoption of the following resolution:

"Resolved, That the North Carolina Press Association endorse the proposed libel law as prepared by Mr. H. A. London, and presented to the Legislature of 1899. That we are surprised and wounded at the treatment, seemingly unjust, negligent and discourteous toward themembers of the press of North Carolina by the judiciary committee of the House of 1899, and especially the sub-committee of said judiciary committee in failing to consider and report said proposed law to the House after it had been properly referred to them. The members of the press feel that they have not been justly and courteously treated in this matter; that the president select a committee to continue the effort until we secure the passage of a just libel law in this State."

The only objection is that the resolution 's not strong enough.

The Pan-American Exposition, says the Philadelphia Record, which is to be held at Buffalo two years hence will be an advance upon all previous ambitions international displays, since its projectors will profit by experience gained at Philadelphia, Chicago, Omaha, Atlanta and Paris. It will be in effect an industrial apotheosis of electricity, which, brought from Niagara Falls, will furnish all the power, light and heat required by the hosts of exhibitors and visitors. On this account alone the Buffalo Exposition will be unique and memorable in the list great industrial exhibitions in this country.

Lovely, oright-eyed little darling. Is it true that you are gone? That today your voice in heaven Mingles with the angel's song? How our hearts cry out in sorrow While the tears flow down our cheeks, For 'twas hard to lose you, Lillian. And it seems our hearts will break.

FLORISTS, Arner Pelk and Swain Sts. HALRIGH, N.C. FLORIDA'S GREAT MELON CROP.

This cetion of Florida has beaten all previous records on producing melons, Never before has there been so many and so large and well flavored. The scason which was thought not favorable to the growth of melons, was somewhat deceiving, as the result shows. It could not have been better. More melons have been grown in the State this sca-son than can be either shipped or consumed. Many train loads have been carried out and sold at small profit, and today the largest and finest of melons, fresh from the farms, are sold here at retail, at from 5 to 10 cents each. Farm ergs in this vicinity report thousands still in the field, and of the best varieties, but as the markets are glutted few will bother to gather and ship any more. It is stated as a fact by physicians and others here that there are a number of families, mostly colored, who subsist almost entirely on melons, very little of the ordinary food being eaten. of the poor people contend that the cheapness of meions enables them to live better than usual. It is said a good melon will hurt no one, but it is the opinion of many that to subsist entirely upon them will cause sickness-chills and fever. Jacksonville Metropolis
