BOERS AIM UNERRING

Boers Bombard a Hospital While the Judge Simonton Sends Order Here Wounded are Being Cared for There-Joubert in Command Now.

London, Dec. 4.—Details from Modder river show that the guards charged eight thousand Boers with rifles and finally crossed the river. The enemy occupied a strong position, intrenched in front, extending five miles along the bank of the stream, well supplied with artiflery, and fought desperately. The opinion of the staff is that never has there been such a sustained fire in the annals of the British army as that the troops had to face on Modder river. The British had no cover whatever and were simply mowed down. It seemed impossible to live through the terrible fire, but the brave fellows did not retreat an inch. The Beer fire was horri bly occurate and they must have mun-bered ten thousand. The Highlanders made several attempts to force a passage of the river, but were exposed to such a numberous cufildaing fire that they retired after suffering terribly. Subsequently, part of the guards got over and held their own for hours against t vastly superior force,

LOYAL BUT NOT SENSIBLE.

There is a disposition on the part of one Democratic representatives to stick more closely than ever to what may be termed "sentimental polities," and to subcidinate the party to the personality of the most prominent candidate for the Democratic Presidential neurination. This is very touching and beautiful as an exhibition of loyalty and affection is not sensible polities, and will lend to the "political graveyard, The prime need of the hour is the realization by Democrats of the fact that new issues have arisen of the greatest im portance; that the issues upon which the Democracy was defeated in 1896 would probably cause the same alignment next year as when they were first voted upon, and that the heps of the Democracy in the future lies in its adaptation to the conditions which have arisen since the war with Spain and its return to the principles upon which has won in part national elections. Waen the leaders of the party take this view of the situation, they include the hope of victory in Presidential centests.
