GOV. SWAIN'S FAMOUS ADDRESS ON RALEIGH

Most Valuable centemplated by the founders of this One of the Sketches of the Capital City's History

1865 - History of the Early Meetings of the States Assembly---The First Locations.

On the secucion of the dedication of Tucker's Paul, wands has long since han transferred has colesponed for Alexan, Dubble and Percoll, an able and interesting address was denvered on the history and growth of the city of Raleigh, by Governor David L. Swain.

The following is taken from the address of Governor Swain.

There were tew more exciting topics in nate revolute pary times, than the lecation of the sent of government.

The first General Assembly, in rultion to which we have much authentic informutton, met at the house of Captain Richard Sandersson, on Little River, in the county of Perspirmans in 1715, and revised the whole body of the public

statute law. The style of enactment is characteristie of the times and of the Proprietary Government, 'Be it enacted by his Ex-cellency the Paintine and the rest of the rane and absolute Lords Proprietors of Carolina by and with the advice and consent of this present General Assembly now met at Little River for the

North-castern part of this province."

From Little River, the seat of Legislation was transferred in 1720, to the General Court House at Queen Anne's Creek in Chowan Precinct, and in 1723,

In 1731, the Proprietary was succeeded by the Reyal Government, and in 1734, the legislative will assumed a form of expression worthy of eastern despotism. "We pray that it may be enacted, and be it enacted by his Excellency, Gabivel

Johnson, Esquire, Governor by and with the naivice and consens or his Majesty's council in the General Assembly of this In Ivil, the Coneral Assembly met

et Wilming on but retirined the following year to Labricon, Toom 1745 to 1761 with the exception of a single session at Bath, it converse at at New Berne. In 1761, it not again in Wilmington, and from that time keep rivally was mainton for metropolitan distinction, much queeted by the assort both, anthorizing the construction of Governor Tryon's vice regar palace at New Berne. The editive comparted in 1770, dedicated to Sir William Prajer, and the subject of his novee its an archite at Roman ver sification, was pronounced on good authoray, in 1723, superior to any sirue I the kind in British or South During the revolution, the General As-

with the exigencies of the times, at Newform, lymstem Unifax, Smithfield, Wake Court Toolse, Hillshoro and Sal-

In 1782, and '83, the Legislature convened at Itali-base, in 1784 and 'Ss, at New Berne, in 1785 at Payerteville, in 1787 at Tatilore, and in 1788 returned to bayetteville. 1787, the General Assembly had

resolved that it "be recommended to the people of the State to authorize and direct their representatives in the Convention called to consider the Federal Constitution, to fix on the place for the unatterable seat of Government. The Convention met at rallsborough

in August, 1788, and resolved that this Convention "will not fix the sent of that it shall be left to the discretion of the Assembly, to ascertain the exact spot, provided always, that it shall be ten miles of the plantation whereone Isaac Hunter now resides in the County of Wake."

The following editorial is copied from the Fayetteville Chronicle or North Carolina Gazette of the 29th of No-

vember, 1790. "On Thursday last the bill for carrying into effect the Ordinance of the Convention, held at Hillsborough, in 1788, for holding the future meetings of the General Assembly, etc., came before the House of Commons, when the question was put, shall this bill pass? The Pouse divided, and there appeared fifty-one for it and fifty-one against it, whereupon the Speaker (Mr. Cabarrus) gave his own vote and pronounced the passage of the bill. It was then sent to the Senate, when that House divided, and there appeared and equal number of votes for and against the passage of the tall, wheremon the Speaker (General

its passage, and the bill was rejected." 1791, the General Assembly New Bern, and in compliance with the positive constitutional infunction passed an act to carry the Ordinance of 1788 The act provides that ten persons shall be appointed to lay off locate the City within ten miles of the plantation of Isaac Hunter, and five percons "to cause to be built and erected a State House sufficiently large to accommodate with convenience both expense not to exceed ten thousand pounds."

In the following year (1792) a majority of the Commissioners to-wit: Fred-

Delivered i.i this City at the erick Hargett, Willie Jones, Joseph Me-Dowell, Thomas Blount, William John-Dedication of Tucker Hall in sen Daws n and James Martin met on the 5th of April, and on the following day purchased of Col. Joil Lane 1,000 acres of land, and trid off the plan of in City, containing 100 nergs, arranged in five squares of 4 nergs, and 276 lets of one acre citel. Caswell square the size of the In thinte for the Deck, Dumb and Lind) the North-western, Burke offer site of the Raleigh Academy) the Northeastern, Nash and Southewestern, More the South eastern, and Phion, on which the State House stands, the cea-

The names of the towns in the direction towards which the principal streets ron, give them their designation, not the names of the Commissioners and other prominent citizens were applied to the others. New Berne, Hill-hope, Halt-fax and Faye teville streets were 99 and all the others 66 feet in width.

In December, 1794, the General As-ently not in the new State House for tice first time:

the Gevernor to reside at the sent of Government, and a plain two story framed building painted white, and an office on the cerner, were provided on lot No. 131. The first gubernatorial number was subsequently the residence of the late James Coman. The first National Bank of North Carolina now occupies the site from which the first Executive office and Mr. Coman's brick store, were successively removed.

In 1813, the General Assembly ap-pointed Henry Potter, Henry Scaewell, William Hinton and William Peace commissioners to creet on the public lands, and conmodious dwelling house for the

occasions, theatrical representations, sleight of hand performances, and last but not least, Fourth of July Orations and Fourth of July dimers, all found their places, and their votaries for a time. These passages and these balls were supplied by the public Treasury of the State. The Tucker Hall cinemates from the quivate exchapter of two brothers, seas of a worthy father, who

Capitol into a signify and the constructive

There were but few of the better class. of travellers, who did not pinse on their passage through Raloga, to behold

and admine it.

The improvements were designed by, and executed under the supervision of Capt. William Nichols recently appointed State Architect, and compacted carry as the summer of 1822. He was a skillful and experienced artist, and under the public greatly his distor a for decided impulse given to ar magnitud improve-ments throughout the State, in private as well as in public editiess.

The white trained convare, planned and constructed for the late Moses Morderal, just beyond the Northera boundary of the city, was copied again and again in tremote sections of the State, and various Centra Houses and other public struc-tures were designed, and in some instances erected under his immediate su-pervision, as in Guilford and Davidson.

It was my lot on the 21st of June, 1831, to staril a helpless spectator,

to this utilized appeal. The show has bridge RALEIGH CHINAMEN NAMES AND PATENTS

in the concluse covered with garland-and bewelf by beintand mealens, little aware how nearly the city may have been on the verge of devastation, and how marriedy the factest of their num-ber may have escaped insuit and death, from this rash act of lawless warfare. (To be Contenued ex acustay.)

thousand plands, to be derived from the sale of lots which they were authorized lay off, and from the sale of lot No. 131, referred to the residence at suceessive periods of Governors Turner. Alexander, Williams, Stone, Smith and

The site selected for the new gubernatorial residence, in common parlance, the palace, was near the terminus of Fayettevlile street, directly South of and fronting the Capitol, and just beyond the Southern boundry of the city. The edifice was copleted during Governor Miller's administration from 1813 to 1816, and he was the first occupant.

In 1819, Duncan Cameron, John Winslow, Joseph Gales, William Robards and Henry Potter were authorized to sell all or any part of the lands purchased of Joel Lane, with the exception of the Stone Quarry, in lots to suit parchasers.

The Governor was authorized from the proceeds of the sale to improve the State House under the direction of the State Architect, and in conformity with a plan which he had prepared and submitted to the General Assembly.

The old State House, which is believ-

ed to have been constructed from the proceeds of the sales of city lots in 1792, was described by a writer of the time as a huge misshapen pile.

In form it was substantially, so far as the body of the building was concerned. though on a smaller scale, very similar to the present editice. It was divided by the broad passages on the ground floor, from North to South and from East to West, intersecting in the centre at right angles. The offices of the Secretary, Public Treasurer and Comptroller were on the lower floor. The Senate Chamber and Hall of the House Commons, with the offices apputenant, above as at present. The Executive office as has been stated was contiguous the palatial residence. The passages and halls of the first

State House supplied all, and more than all, the accommedation to the public worship on the Sabbath, balls on festive more finely finished edifice. less extensive, but better furnished, and the Statue of the father of his country was a sheet of blinding, hissing flame, and to hear amidst the admiss breatness silence of the stupined unititude around it, the piteous exclamacen of a chia, "poor State House, poor Statue, I so There were thousands of adults present as sorroful and as powerless as

It was my lot as Chief Magistrate of the commonwealth, on the fourth cay of July, 1833, to by the corner stone of the present magnificent structure of . 3 the present Capitol, supposed on its completion to be the most magnificent struc-

ture of the kind in the Union. It was my lot on the morning of the 13th of April, 1865, as the friend and representative of Governor Vance, to find, on approaching the Southern of the Capitel, the doors and windows closed, and a deeper, more dreadful silence shrouding the city, than during the sad catastrophe to which I have re-ferred. I met at the South front of the waited on the executive department, the venture beyond the door. He delivered me the keys and assisted me in opening the doors and windows of the executive office, and I took my sation at the entrance, with a safe conduct from Gor eral Sherman in my hand, prepared to surrender the Capitol at the demand of his approaching forces. At that moment a band of maranders, straggling from Wheeler's retiring cavalry, dismounted at the head of Fayetteville street, and began to sack the stores directly contigions to and South of Dr. Haywood's residence. I apprised them immediately, that any show of resistance might result in the destruction of the city, and urg d them to follow their retreating comrades citizen, the first I saw beyond his threshold that morning, came up at the moment, and united his remonstrances to mine, but all in vain, until I perceived and announced that the head of Kilpatrick's column was in sight. coment every member of the band, with the exception of their chivalric leader. was in the saddle and his horse spurred

GOD LOVES A MAN THAT MAKES US LAUGH.

The morbid man was wears a face Long as a mase's -his beastly brother-Who icls one canning stown give price, But only to present another; Who always is content to grope Along the path of care and bother

And discencent, can never nope To win the good will of the Father. tiod has no use for seigmin chaff, But loves the usin that makes us kingle.

The sunshine of a merry smile, The music form of ripling anighter, Are sent by heaven to beginle The tedious march to the hearafter. Their rays will pierce the darkest clouds

And night chem with a suver bring, Dispel the grown that our enshrouds The dreary lives or the repaining. Fun's golden cup is here to quaff-God loves the man that makes us laugh;

We were not placed upon the earth Today should always ring with mirth Without a thought of the tomorrow, And heaven has sent as energy men To start and lead the merry chorus, To pierce with voice and pointed pen The earthay clouds that gather o'er us;

To stab the gloom wih humor's gaff-

God loves the man that makes us laugh,

We stronger grow upon our feet When toes of clinging care enrage us If in our daily toil we meet A man with smale that is contagious. His face lights up the darkened soul,

As sun-rays pierce the veil of sadness, Adds sweetness to the latter bowl And makes the heartstrings thrill with gladness:

accepted an inculator, SOME STRANGE COUNCIDENCIES Music is also represented, as Mr. Load or received a letter serving that his month piece for musical instruments had been favorably reported. Pleasure has not acts favorably reported. Pleasure has a strong d legation here, as Mr. Liber parented a pleasure and slide course and a convoyer therefor, while one of the Durner patented an apparatus for shak ing dice.
Mr. Weatherway patents-lithe last syl

lable in his mane for a device the souling paneters in pneumatic time, and Mr. Turni-posed invented a form of fertilizer. One of the weather men is again seen with a patent attachment for rubbers. The inventor is F. T. Weather. In or der to further enlarge the stationery stock Mr. Penmen invented a note-book, and his patent was followed by Mr. Pen-c'l, the originator of an eraser. Mr. Wheelwnicht's reme is associated with a patent wheel, and next is Mr. I. Cort at his corn-husber.

The temperate name of Mr. Soher belongs to a man who inverted a barrel He is followed by Mr. Croquette who petented an apparatus for compressing air. The fire department is also called into service, and fur like nomes are no exception to the rule, W. O. Blaze patented a cleaner and smake detector. and Mr. Goodnight has to his credit a fire-extinguisher. Mr. Split is registered with a device for sealing splits in pune tured tires, while Mr. Quark, a leather man, has a patent preparation for pol ishing the same.

The strangest coincidence, however, ob served in the veteran clock's collection case of Mr. J. Stanton. He made application for a patent compse-cooler, but died before the patent was granted. An administrator for his estate was up pointed, who also died before the patent was granted, and a second administrator was appointed by the name of Teller. It scems that there were a number of simil lar devices under consideration at the same time, and when finally the grant was made to Mr. Tellers, he read in the papers of the same date that the examiner of patents who reported on the
