MCARTHUR'S REPORT

The Philippines Must be Conquered by Mere Force of Arms

413 STATIONS OCCUPIED.

American Loss 1,073 Filipinos Lose 6,785. The Municipal Governments.

By telegraph to The "Imes.

WASHINGTON, Nov. 10.—General
McArthur's annual report, written
September 1st, was made public today. Every question in the Philippines is treated, and the inference drawn by many of those at head-quarters is that if the United States to conquer the Philippines, it must

be by sheer force of arms.

While, according to the reports,
Aguinaldo and his band voted to discontinue the war November 12, 1899, as a matter of fact it is continued. of war and assume the garb of peace the Filipinos have successfully kept the field, but at a tremendous loss.

The fifty-three stations which were case. occupied by the Americans on November 1, 1899, had on September 1, 1900, expanded to 413. While the Americans had lost 1,073 in killed, wounded and captured, the Filipinos had lost 6,-785. The report says: "The Filipinos are not a war-like or ferocious people. Left to themesives a large number would gladly accept American su-premacy, which, they are gradually coming to understand, means individual liberty and absolute security in their lives and property.
"However, they have been misled

until they believe that 'in all doubtful matters of politics or war, men are never nearer right than when going with their own kin. In consequence most of the towns in the archipelago have an organized municipal government for which people have evinced such intelligent capacity as to encourage the expectation of rapid progress in the art of self-government."

It was proven that there was some very bad conduct on July 31st on the part of some citizens, and a speaking broken up, but to constitute a charge of conspiracy a previous agreement to acomplish some unlawful purpose by concerted action is required and the prosecution failed to show that there was any such agreement prior to the affair at Smithfield.
