John Wilber Jenkins ..... Editor. fohn C. Drewry . . . . General Manager.

THE ANNUAL PENSION RAID. Our pension bill the coming year will amount to more than \$145,000,000. That is many more millions than any Enropean nation pays out for pensions, though some of them have armies twenty times as large as ours. We have been for years pointing out they bear. It will surprise some to price. know that the United States pays out more for its little military establishment than any other country in the world. Of course the cost of pensions is included in the cost of the military establishment, because a pension is a reward for past services in the army. just as monthly pay is for present services. It is a common saying that "Republics are ungrateful," but the I nited States not only pays the highest monthly wage to its soldiers, but pays them the highest pensions, for the longest time of any country. Does any an suppose, however, that, if the matter of pensions were considered from a business standpoint, and dealt with by states men, such enormons pensions would be allowed. The pension for the great increase in the pension list, and the subsequent burden placed on the tax payers is the anxiety of the demagogues in the North and West to secure the soldier vote. It is a notorious fact that there is hardly a politician in all that section who will raise his voice against any pension bill, or who will even proest against fraudulent pensions, because he is afraid of losing the soldier vote. Pensions have been secured to pay political debts, rather than because of the merits of soldierly service. Pensions have been used to bribe votes, only in this case the candidate does not take the money out of his own pocket, but compels the government to be a party to the bribery. Can any man look at the enormous pension list we carry, and say that It is just and honest? If the beneficiaries continue to accumulate from the war with Spain and the war in the Philippines as they have begun, and continue as long as the veterans: of the civil war, our great grand children will still be paying pensions on account of our little unpleasantness with Spain. And when the question of going to war in the future arises. the main point will be, "Can we afford the expense of the war?" so much as the question, "Can we afford the burden of pensions growing out of the

President Harvie Jordan, of the Interstate Cotton Growers' Association. makes the charge that the government ection erop report is being manipulated in favor of the ring of speculators who "play" the cotton market in New APPLES, ORANGES, York and Liverpool. This is a grave charge, and coming from such a source deserves at least investigation. Is lenked out the Saturday night before the last report was given to the public that certain brokers in New York had been offered advance information, if they would pay a considerable sum for the news. As it turned out the advance news would have been worth thousands of dollars to them because the market fell more than half a cent on the report. If the officials or clerks who have the report in charge are anscrupulous enough to sell this important information in advance, it does not seem that they are entirely above suspicion. It is a mat- nay be far from right today. ter of great importance to the farmer and the cotton factor alike that this report be kept as fair and importial ns possible.

Atlanta is to have a new hotel to cost three hundred theasand dollars. in addition to the three or four other fine hotels it has already. Raleigh ought to be able to afford at least one fine modern hotel, if we had such a structure here, well managed and well advertised it would attract many wisitors from the North who would delight to spend a while here, going to Florida or returning from the far South. This is the best half-way point between New York and Beston and the West Indies. A gentleman from Canada who was visiting here sometime ago said this was the finest climate he had ever seen, and that is the opinion of many who have visited all parts of the country.

Mr. Bryan is to publish a weekly ewspaper to be called "The Common-Some of his friends regret that he follows so closely the example of the Hon. Jerry Simpson. The old adage, "Would that mine enemy would anguite a book," may in time be changed etc. o "O that mine enemy would publish a newspaper."

The Wilson News says: "The Ralgh Press Club is on the search for a stitute for Ananias. How would the ..... Club do?"
