Milk and the Mayflower!

The health value of milk has been known through the ages. However, a fatal mistake was made by the voyagers on the Mayflower. They failed to make provisions for supplying milk for their children. As a result, no child under two years survived that first awful winter. Thousands of infants have known no milk except COBLE-Milious pasteurized and homogenized milk with extra Vitamin D added. Truly, do we grow by helping others to grow.

Milk—known as "The He-man's Drink!"

Milk for our armed forces? Yes, and plenty of it, but with something new added, or rather, there is a new appreciation of its body and morale building qualities. So many fighting men ask for it, first thing, after they come from battle lines. It is estimated that milk products make up as much as 25 per cent of the diet of our service men. Sons of returning veterans will doubtless re-discover milk as "The He-man's Drink."

Foil the villain!

Is there a "cream skimmer" in the house? You know, the person who skims the cream from the top of the bottle of ordinary milk for his own selfish use. You'll foil him with COBLE-Milious HOMO Milk because the cream is sealed permanently into every drop. What — no cream line? No, but the richness and the cream is still there, homogenized into every drop—mixed in so that the last drink is just as good as the first.

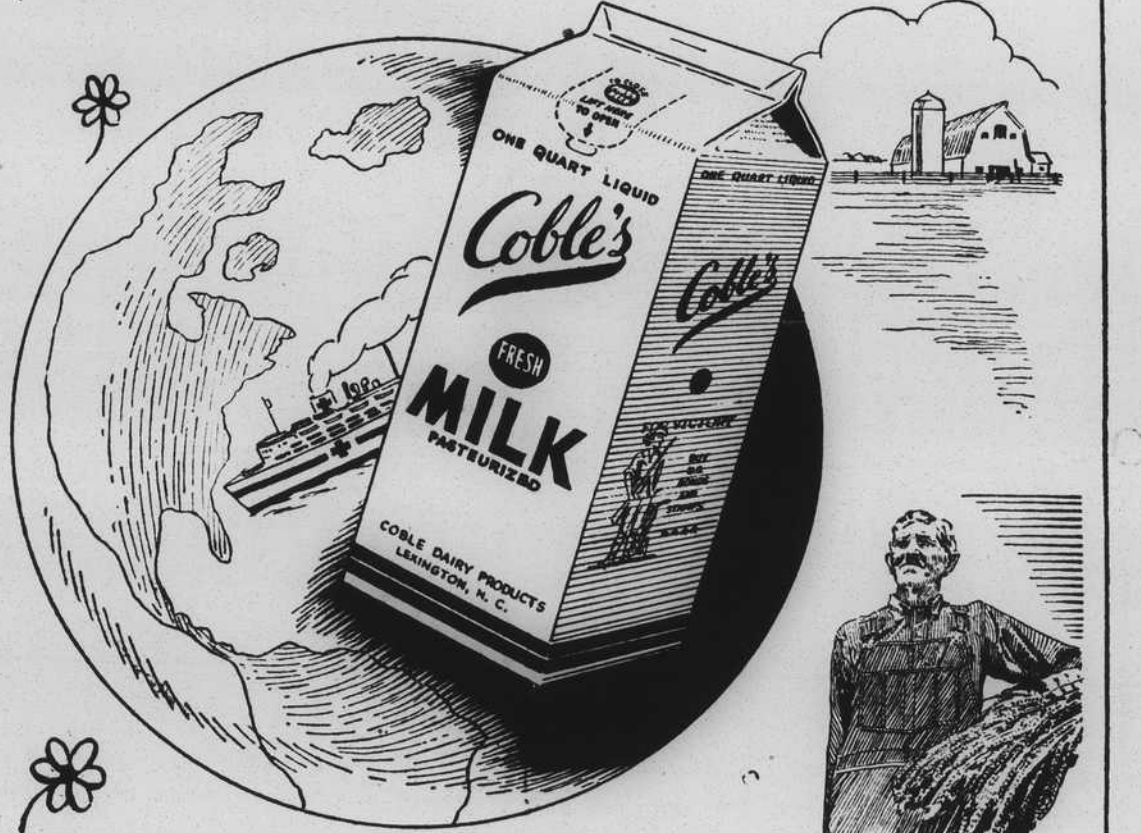

And there is a new softness and digestibility of the curd in the stomach, especially good for children and the sick, and a new bland deliciousness that will make your little "Johnny Homo" go for it in preference.

Pictured below is the bottle top of this finer milk—telling of its goodness—Try it—just once!

Now, from home farms — FROZEN fresh MILK for our wounded on the 7 seas!

It is comforting to know that some of our own boys, on returning hospital ships, may be getting plenty of FRESH milk right from our home farms. For Coble, working with our home dairymen, is shipping thousands of quarts of "Pure-Pak" FROZEN fresh milk, every day, to embarkation points for our hospital ships. It is the same COBLE-licious Milk so many of us know—except with a renewed appreciation by our fighting men for its wonderful ability to rebuild bodies and morale.

New health-value and economy

Simply, Coble FROZEN milk begins with the best in fresh, pasteurized milk—plus the magic of the Pure-Pak machine. A flavor and leak proof paper carton is folded, filled and sealed in one continuous operation. The cartons of milk are quickly frozen, placed on hospital ships for use around the world, wherever our men are fighting. To our wounded, Coble frozen fresh milk is really a "drink from home," quickly thawed, deliciously tasteful, wondrously health building.

The Coble quality program

We can't improve on our "best health food" as it comes from our well conditioned cows. But, we can and do bring milk to you at its best with greater than ordinary health and safety precautions. First, there was the necessity for more sanitation in the production of milk. Then, came pasteurization—for killing and re-

tarding bacterial growth. Later, came homogenized milk—for improved digestibility and for sealing the "cream in every drop" permanently. And, after the war, fresh milk in paper cartons—with no bottles to wash or return and with more economy and storing convenience.

On the Home Front, it is the Coble quality program: (1) to supervise our dairymen more rigidly, (2) to pay them the utmost for their milk, (3) to build a finer family spirit and more careful methods among Coble Co-workers, and thus, (4) to bring you the best taste and health value in quality milk products.
