

GARDEN TIME

Every garden plant seems to have its special pest and some of them have more than their share of pests. It is not possible to give specific control information in a short column such as this, but certain principles of control may be emphasized.

Organic gardeners to the contrary, we are going to have to spray our garden crops if we expect control most insect and disease pests. In order to carry on a successful spray program we must first know or determine what pest we are trying to control. Is it a disease? Is it a chewing insect like a bean beetle? Or is it a sucking insect like an aphid? And what sort of damage does it do?

Second, we should know what spray material to use to control the pest and how to apply it to be effective. For example, it would require a fungicide to control diseases. It is often necessary to know how to apply the spray. For example, the Mexican bean beetle feeds mostly on the underside of the leaf; therefore, the spray must be directed against the underside of the leaf in order to be effective.

STATE COLLEGE ANSWERS

Question: What is a penetrating seal floor finish?
Answer: There are two types of floor finishes — surface finishes like shellac, varnish and enamel, and penetrating seals. The hard surface finishes wear off where they receive the most traffic. After a floor has been finished with penetrating seal, it can be refinished without being resanded.

Question: What are the highest yielding varieties of grain sorghum for North Carolina soils?
Answer: Martin, Wheatland, Westland, Redlan, Plainsman, Caprock, Reddine 66, Dwarf Kafir, Early Hegari, Bonita and D. D. Yellow Sooner.

Question: What are the safest materials to use in cleaning grain storage bins?
Answer: Methoxychlor, DDT, or TDE are the safest. Either wettable powders or emulsions may be used. The wettable powders are used at the rate of one pound of 50 per cent powder, or two

quarts of 25 per cent emulsion, in three gallons of water. This amount will cover 1,600 square feet of surface.

STATE COLLEGE HINTS

State Home Demonstration Agent

SAFETY SHOES — A medium-heeled, comfortable shoe is the only safe type to wear while doing housework. A high heel is a tripping hazard, weakens your back leg muscles, and induces fatigue.

If you wear slacks while you work, wear them without cuffs. It's easy to catch your heel in a cuff, especially if the slacks are a little too long. It's easy, too, particularly while you're going down stairs, to catch your heel in a loose hem such as this. Hems should be kept in good repair.

HOUSEHOLD POISONS — Every household poison should have a printed label which gives the general classification of the poison and bears the skull and crossbone symbol. If there are children in your household never store poisons under the sink or in a low cupboard. Read all instructions carefully and wash your hands after using any poison.

BE CAREFUL WITH RAZOR BLADES — Always place used razor blades in a special container. Careless disposal of razor blades can cause serious cuts.

Chrysler Introduces New Type Steering

Chrysler, which is 1951 pioneer of power steering for automobiles, now has introduced a new type called coaxial power steering.

"Because power steering increases driving safety, makes driving more restful and provides effortless parking almost every automobile manufacturer has followed Chrysler's lead and offers power steering in some form," Quinn said.

The Chrysler coaxial unit is designed as an integral car component, not as an add-on or booster feature. Its simple, functional design means less bulk in the engine compartment allowing easier access to the other equipment such as starter and brake pedal.

It has fewer parts and is lighter in weight than any other integral-type power steering system now on the market because of its simplified mechanism which promises longer operational life without adjustment.

securely locked in place when the unit is built.

Coaxial power steering retains the exclusive advantages which have marked Chrysler power steering since its introduction, working to provide safer, easier steering and parking at all times. The unit applies power steering help directly in proportion to need and not on an on-again-off-again basis, so that drivers always have a perfectly consistent feel of the road through the steering wheel. Whatever the steering job, the driver supplies approximately 20 per cent of the effort.

The danger involved in blow-outs is greatly minimized because even when a front tire blows little effort is required to continue in a straight line.

The danger involved in blow-outs is greatly minimized because even when a front tire blows little effort is required to continue in a straight line.

Take Soil Sample Now For Fall Crops

The farmer who looks ahead generally comes out best in the long run, according to Charles W. Welch, soil testing specialist, N. C. Department of Agriculture.

For best results from soil tests it is necessary to collect good samples, explains Welch. Information regarding soil tests and instructions for sampling can be obtained from local agricultural agencies or by writing the Soil Testing Division, State Department of Agriculture, Raleigh.

Edgecomb Negro Farm Tour Set For June 28

A county-wide farm and home improvement tour has been scheduled for Edgecombe County Negro farm families, June 28, beginning at 9:30 a.m., according to H. M. McNeill and Hazel S. Parker, Negro farm and home agents for the Agricultural Ex-

ension Service.

The purpose of the all day tour is to offer an opportunity for as many rural families as possible to obtain an absolute divorce on the grounds of two years separation; that the defendant will further take notice that he is required to appear at the office of the Clerk of the Superior Court of Gaston County, N. C., within 20 days after the 26th day of June, 1954, and answer or demur to the complaint in said action or the plaintiff will apply to the court for the relief demanded in the complaint.

This May 24, 1954.
PAUL E. MONROE
Clerk Superior Court
DAVID P. DELLINGER, Atty.
Cherryville, N. C.

LETTER TO THE EDITOR

Mr. Fred K. Houser
Co The Eagle
Cherryville, North Carolina
Dear Sir:

I wish to take this opportunity to inform you that a young man of your community has been selected as "Airman of the Month" for the 1931st AACS Squadron. He is Airman First Class George M. Parker, son of Mrs. Vada Parker. This commendable program which increases incentive, recognizes outstanding achievements, emphasizes the importance of the individual in cooperative effort and enhances the efficient accomplishment of the mission.

This young man enlisted in the Air Force at Charlotte, North Carolina on 15 October 1951 for a period of four years. He received his education at the Cherryville schools. During his high school days, George was a member of the Cherryville High School Band for 5 years and was President of the Band during his senior year. He was active as a member of the Allied Youth Club, member of the Beta Club, High School Choir, President of the Junior Class and Vice President of the Senior Class. He ranked 6th in his graduation class of 50 in June, 1951. As a Senior George was President of the Beta Club and the Allied Youth Organization.

As for the future, George will be returning to the zone of the interior around 1 November 1954 for reassignment and completion of his enlistment.
JAMES G. MOORE
Major, USAF
Commander

The most modern "eight" in the industry is the lowest-priced of all!

FORD'S NEW 130-h.p. Y-Block V-8
Hard as it may be to believe, you can own the newest high-compression, low-friction V-8 in the industry for less money than any other V-8. . . even less than most sixes. And unlike some V-8's, Ford's new Y-Block V-8 has an extra deep block which makes it a more rigid, smoother, quieter engine. In addition you get the gas-savings of Ford's high-turbulence combustion chambers and Automatic Power Pilot. Why not try Ford's new overhead-valve "Y" this week?
