With your land when for the sake of saving a few dollars you tuse a fertilizer whose only recommendation is its analysis. It requires no special knowledge to mix materials to analyses. The value of a fertilizer lies in the materials used, so as not to over feed the plant at one time and starve at another. This is why Royster brands are so popular. Every ingredient has its particular work to do. Twenty-five years experience in making goods for Southern crops has enabled us to know what is required.
